Introduction

Our approach to fees is simple – we aim to ensure that clients are clear about the services being provided, and the fees they are required to pay for those services. We aim to agree fees that represent fair value, both to ourselves and our clients. This provides a solid foundation for a successful long-term relationship.

Before we provide you with our advice, we will add together all of the costs and charges payable, so that you can clearly see and understand the overall costs of our services and recommendations.

This is referred to as ‘Aggregated costs and charges’ disclosure, and will be included within our scope of work and/or suitability letter.

Transparency is key, particularly where fees are concerned. Fees will be detailed in monetary terms, and agreed by you in advance.

You will also be notified of any additional costs which might be incurred, prior to work commencing.

Should you have any other planning requirements not listed, we will be happy to discuss them with you and agree a personal arrangement.

Our approach to fees

We work with many clients who have taken advice from other financial advice firms and therefore we have a good understanding of the fees they charge and how these are structured.

In the majority of cases, adviser fees depend on you following their course of action or investing capital; this is

called contingent charging. A typical implementation fee from such advisory firms will range between 1% to 5% of assets invested. Based on £1million, for example, that is £10,000-£50,000.

Our approach to fee charges is different as illustrated in the example below.

	Commonly adopted fees in our profession	*Indicative TPO initial fees
CASH FLOW	N/A	£1,850 to £3,000
EXISTING INVESTMENT & PLAN ANALYSIS	Nil	£1,850 to £6,000
ADVICE	Nil	£2,000 to £5,000
IMPLEMENTATION	1% to 5%	Nil
Total fee payable	£10,000 to £50,000 Fee is contingent	£5,700 to £14,000 If you accept our recommendations, we do not charge an implementation fee

*Your journey, and the services you engage us to provide, are based on your personal financial planning needs and will not necessarily mirror the journey in the example above. Please read on for our detailed menu of services and associated fees.

Your advice journey with The Private Office

Our journey starts with discovery – during the discovery phase you will get to know more about TPO, the services we provide and start to build a relationship with your adviser. This is a no obligation introductory meeting which is **free of charge**.

If you decide to engage with us to support you in meeting your current and future financial goals your adviser will seek a deeper understanding of your financial aspirations and the products and planning you have already put into place to meet your objectives. This will typically be followed by in depth analysis of your existing investments and plans to assess whether they offer good value for money and are fit for their intended purpose. We describe this as the planning stage and an explicit fee will apply to each planning service required from the menu of services later in this document.

Once we have completed our review we will prepare your personalised recommendation for how best to meet your objectives going forward. A separate advice fee will be levied.

We do not charge an additional implementation fee for facilitating the set up of the plans we have recommended.

Our fee charges and VAT

The application of VAT in relation to financial planning advice and the provision of ongoing services is complex.

Broadly speaking, VAT is not chargeable if the financial planning services we provide to you leads us to introduce (recommend) a financial product which is implemented. This is known as intermediation.

Where intermediation occurs both our initial advice fees and the ongoing investment and advice fees associated with these products are free from VAT.

However, it should be noted that not all of the services we provide fall within the definition of intermediation and in such cases VAT will be charged in addition to the fees outlined in this document.

Examples of services we provide where VAT will normally apply are listed below:

- Cash flow planning
- Cash Management
- Defined Benefit Transfer Analysis and Advice
- Financial planning assessment and discussion documents
- Ongoing Financial Planning fees (Enhanced and Bespoke service clients only) – this does not apply to your ongoing investment fees which are payable in addition and which are associated to a specific financial product making them VAT exempt.

We will always confirm the VAT position for the services you require before commencing work.

Financial Planning Only service: starting from £3,750 per annum

We have our own highly qualified investment team in place to ensure that the investment solutions we offer are suitable for the needs of our clients. However, we recognise that some individuals prefer to manage their own portfolios or to maintain an existing investment management relationship but need assistance in structuring and maintaining their financial arrangements. We are able to offer a Financial Planning Only service which provides the following core services:

Ongoing Services

Regular Review Meetings

Ensure that your financial plan remains suitable for your needs

Cashflow Updates

Ensure your plan remains on track

Financial Planning

Advice on the funding of your tax efficient allowances

Client Portal and App

For the secure exchange of documents

Tax and legislative updates

which may impact your financial plan

We are happy to provide a bespoke financial planning only service whereby additional services can be added to our core service menu on request – annual fee by agreement.

Ongoing advice fees & service classes

We believe that ongoing advice is the key to enabling clients to make sensible, long-term decisions about money which can help them to achieve their personal goals. We work closely with our clients to help them build plans and stay on track, through a process of regular consultation refinement and restructuring where appropriate.

It is never too early to start planning for your long term financial well-being and we offer a range of ongoing services which have been designed to suit the individual needs of our clients.

TPO service class

1	Core
2	Premium
3	Enhanced
4	Bespoke

Our **Core** service has been designed for clients who are at the start of their savings journey and are seeking a simple solution to their planning needs but underpinned by sound planning principles.

Our **Premium** service is a natural progression service for clients who have seen their investments grow in value and start to need a more refined solution. As invested wealth increases there may be a heightened need for tax planning services and more diversified investment solutions. Our **Premium** service also caters for clients needing a guided decumulation service but who have not achieved sufficient momentum in their savings journey to require more specialized services and are content to remain invested in a centrally managed investment proposition.

Our **Enhanced** service is our most comprehensive offering for individuals at any stage of their investment journey who value a personal administration and adviser relationship. Clients will typically have accrued a substantial amount in invested wealth and may require more complex planning solutions. Clients receiving our **Enhanced** service will have access to inheritance tax planning solutions as well as capital preservation and structured decumulation advice services.

Finally, we have our **Bespoke** service concierge offering. Clients will typically have accumulated £10 million+ of investable assets and are seeking a highly personalised planning service, often working in conjunction with their tax planners and legal advisers. This service is ideally suited to entrepreneurs, business owners planning for a

business exit and those with inherited wealth wishing to preserve their estate for successive generations.

Please check the table opposite for a more detailed explanation of each of our ongoing services and their associated costs.

Paying your ongoing advice fees

The facilities we are able to offer for payment of agreed ongoing services will vary depending on your service class. This will be explained in more detail by your adviser.

Family linked charging facilities

We have many decades of experience advising families and understand that as wealth accumulates the legal structures supporting your planning can become more complex.

We have a family linking charging policy in place which means that you and your children can benefit from a reduction in the costs of the services they receive whilst they live in the family home.

Heritage product service

If you are a long term investor you may already have capital invested in products offered by traditional Life Assurance providers.

Our heritage product service has been designed for clients who are invested in Life and Pension products offered by these providers, for example Onshore Investment Bonds, Retirement Annuity Contracts and Personal Pension Plans.

These products will typically have a restricted range of funds available for investment. This means that the solutions available within the product environment may be limited but they may also include other features which are attractive to clients.

These can range from a guaranteed annual investment return, guaranteed annuity rates when you retire or a discount on your investment for larger fund values. For other clients it may be that they have built up significant income tax liabilities which need to be managed carefully on an ongoing basis as capital is extracted from the plans over successive tax years.

Our heritage product service fee of £500 per annum (per plan payable annually in advance) includes an annual review of the ongoing suitability of the plan, taking into account any change in your personal circumstances, and a review of the underlying investment fund/s to ensure they continue to reflect your appetite for investment risk and volatility.

The plans will also be included in your annual valuation.

EQUITY RELEASE

Our planning fees for providing an equity release service range from £5,000 to £30,000 with the fee applicable being determined by the complexity of your needs and the work which we will undertake to provide you with the most appropriate solution for your particular circumstances.

EQUITY RELEASE	
Example scenario	Estimate fees
<p>Home adaptation</p> <p>In this situation the expenditure need is known in advance and there are no additional planning needs to be addressed.</p>	£5,000
<p>Care needs funding</p> <p>In addition to exploring equity release options we will also consider the availability of local authority assistance and the purchase of a care annuity (funded from existing liquid assets or from equity released from your home).</p>	£10,000
<p>Debt Repayment</p> <p>Getting a detailed understanding of current debts to be cleared and costs. This can sometimes involve multiple properties. Looking at cash flow and implications of clearing the existing debt and benefits of doing so.</p>	£20,000
<p>Estate Planning</p> <p>Property wealth can make estate planning challenging during your lifetime and equity release can be a useful tool in passing wealth to the next generation during your lifetime in a tax efficient manner. When estate planning is the key planning need we will engage with the extended family and their legal advisers to ensure that a joined up approach is taken. This type of planning will often include an element of trust planning, gifting and insurance considerations.</p>	£30,000
