

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Defensive Managed Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Inc class (ISIN: GB00BMN90635). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver income and capital growth over the long term (5 years or more) through investment in sustainable securities.

Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund will invest globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The investment objective of the Fund will be achieved through investment in securities that provide or produce sustainable products and services as well as having a progressive approach to the management of environmental, social and governance ("ESG") issues.
- Allocations to equities, fixed income, and cash will vary over time depending on market circumstances. Asset allocation limits will remain in line with the following asset allocation ranges:
 - Equity – 20-50%
 - Fixed income – 10-60%
 - Cash – 0-20%
- The Fund may invest in collective investment schemes including other Liontrust Funds (up to 10% of Fund assets), other transferable securities, money market instruments, warrants, and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The Fund can invest in equities, bonds and cash.
- For equities, the process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency, Improved Health and Greater Safety and Resilience) and 20 themes within these. The team then invests in well-run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of idea generation, there are three further criteria all holdings have to satisfy:
 - Broader sustainability: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity.
 - Financial modelling and valuation: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- For the fixed income process, macroeconomic analysis determines the managers' top-down view of the world and this helps shape portfolio construction and appetite for risk. After this, the managers aim to focus on high-quality issuers and believe this can reduce bond specific risk. Assessment of quality is a distinctive part of their process, combining traditional credit analysis with a detailed sustainability assessment based on their proprietary model.
- The managers seek the best-value bonds from high-quality issuers across the capital structure, along the maturity curve and issued in primary credit markets (UK, US and Europe).
- The Fund's asset allocation is based on long-term risk/return profiles of equities, bonds and cash. The managers then tactically adjust these exposures within predefined ranges to enhance overall investment returns. Tactical positioning is driven by analysis of leading economic indicators and then an assessment of asset class valuations relative to both their own history and to each other.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 4 primarily for its exposure to a diversified portfolio of Global equities and bonds.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

SUSTAINABLE FUTURE DEFENSIVE MANAGED FUND

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	0.93%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

Past performance

- Past performance is not a guide to future performance.** It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 23 July 2014.
- The 2 Inc share class launch date is 23 July 2014.
- The base currency of the Fund is pounds sterling.

- The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges** figure is based on expenses as at 31 December 2022. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/costs-and-charges.

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Income Opportunities Fund

A sub-fund of Ninety One Funds Series i
managed by Ninety One Fund Managers UK Limited

Class I Accumulation shares in sterling
ISIN: GBO0B2Q1J816

Objectives and investment policy

The Fund aims to provide income with the opportunity for capital growth (i.e. to grow the value of your investment) over 5 years. The Fund targets a return of UK Consumer Prices Index (CPI) +4% each year (before fees), over 5-year rolling periods.

While the Fund aims to achieve its objective and its performance target, there is no guarantee that either will be achieved, over 5 year rolling periods or over any period and there is a risk of loss.

The Fund invests primarily (at least two-thirds) in the shares of companies and bonds (or similar debt-based assets) that are investment grade (have a relatively high credit rating).

The Fund focuses on investing in assets that offer a reliable level of income, together with opportunities for capital growth, in many market conditions. Investment opportunities are identified using in-depth analysis and research on individual companies.

The Fund may invest up to 60% in the shares of global companies. These companies may be of any size and in any industry sector.

As a result of the investment policy above it is expected that the volatility (the pace or amount of change in its value) will be lower than 75% of that of shares of UK companies (measured using the FTSE All Share Index). This level of volatility is not guaranteed and there may be times when it is exceeded.

Bonds (or similar debt-based assets) may be in any currency and may be issued by any issuer e.g. governments or companies.

The Fund may also invest in other transferable securities (including bonds issued by governments and companies with relatively low/no credit rating), money market instruments, cash or near cash, deposits, up to 10% in units or shares of other funds (which may be managed by a Ninety One group company, or a third party) and derivatives (financial contracts whose value is linked to the price of an underlying asset).

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used for investment purposes (i.e. in order to achieve the Fund's investment objectives) or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The Fund cannot replicate the target benchmark index. The benchmark index is not investable and therefore cannot be replicated.

The Investment Association Mixed Investment 20-60% Shares Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk Potentially lower rewards **Higher risk** Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because the mix of assets the Fund invests in, tends to produce returns which fluctuate more than those of cash funds but less than those of funds which solely invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

Liquidity: There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than might be anticipated.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 30 September 2022. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	0.88%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 7 June 1993 and this share class on 3 March 2008.

- Class I Accumulation shares in sterling
- UK CPI + 4%
- IA Mixed Investment 20-60% Shares

On 04 October 2021, the Fund changed its name from Cautious Managed to Global Income Opportunities. There was also an investment objective and policy change, meaning that performance shown prior to this date was achieved under different circumstances.

Practical Information

The Fund's depository is State Street Trustees Limited. The latest published prices for shares in the Fund are available on www.ninetyone.com. Other share classes are available for this Fund as described in the Ninety One Funds Series omnibus prospectus. UK tax legislation may have an impact on your personal tax position.

The Fund is a sub-fund of Ninety One Funds Series i. You may switch between other Ninety One Funds Series i, ii, iii or iv sub-funds or share classes of the same sub-fund at no extra charge (unless the other share class has a higher entry charge, in which case the difference may be payable).

Details on switching are contained in section 3 of the Ninety One Funds Series omnibus prospectus. The assets of the Fund are ring-fenced and cannot be used to pay the debts of other Ninety One sub-funds in the same Ninety One Fund Series.

Ninety One Fund Managers UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Ninety One Funds Series omnibus prospectus.

The latest remuneration policy relating to Ninety One Fund Managers UK Limited is available free of charge on request from the address below or from: www.ninetyone.com/remuneration English language copies of the Ninety One Funds Series omnibus prospectus and Ninety One Funds Series i latest annual and semi-annual reports may be obtained free of charge from Ninety One Fund Managers UK Limited, 55 Gresham Street, London EC2V 7EL.

This Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

This Key Investor Information Document is accurate as at 20 February 2023.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Schroder MM Diversity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B60CZD52)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the UK Consumer Price Index (after fees have been deducted) over a 5 to 7 year period by investing in a diversified range of assets worldwide. There is no guarantee that this objective will be met and your capital is at risk.

Investment Policy

The fund is actively managed and invests its assets indirectly through collective investment schemes, exchange traded funds, real estate investment trusts and closed ended funds in equities, bonds and alternative assets worldwide. Alternative assets may include hedge funds, real estate, private equity and commodities.

The fund may also invest directly in equities and bonds. The fund may directly or indirectly invest in money market instruments, and may hold cash. The fund may invest up to 100% of its assets in collective investment schemes (including other Schroder funds).

The Fund invests (directly or indirectly) one third of its assets in equity and equity related securities, one third in fixed and floating rate securities, money

market instruments and cash, and one third in alternative assets. The Fund may deviate from this by up to 5% of assets (+/-) for equity and equity related securities and alternative assets, and by up to 10% of assets (+/-) for fixed and floating rate securities, money market instruments and cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the UK Consumer Price Index, and compared against the Investment Association Mixed Investment 20% to 60% Shares sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated)

generally carry greater market, credit and liquidity risk.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Multi-Manager risk: The fund allocates capital to multiple strategies managed by separate portfolio managers who will not coordinate investment decisions, which may result in either concentrated or offsetting risk exposures.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 1.30%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2022 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.73%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Please note that your fund may invest in another fund that charges a performance fee.

Past performance

Performance achieved between 2009 and 2014 was achieved under circumstances that no longer apply. The fund name and charges changed on 24 March 2014.

■ Z Accumulation GBP (GB00B60CZD52)

■ UK Consumer Price Index

■ Investment Association Mixed Investment 20% to 60% Shares sector average

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 22/05/2002.

The shareclass was launched on 09/07/2010.

Performance figures are only available since the launch of the respective unit class.

Practical information

Trustee: J. P. Morgan Europe Ltd.

Further Information: You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly reports and the latest price of units from www.schroders.com/ukinvestor and from Schroders, PO Box 1402, Sunderland, SR43 4AF, England, telephone 0800 182 2399. They are in English, free of charge.

Tax Legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Switches: Subject to conditions, you may apply to switch your investment into another unit class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration Policy: A summary of Schroders' remuneration policy and related disclosures is at www.schroders.com/remuneration-disclosures. A paper copy is available free of charge upon request.

The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Glossary: You can find an explanation of some of the terms used in this document at www.schroders.com/ukinvestor/glossary.

Benchmark: The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

The comparator benchmark has been selected because the investment manager and the manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

KEY INFORMATION DOCUMENT

Purpose:

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Document valid from: 05/01/2023

Trojan Fund, X Accumulation, ISIN: GB00BZ6CNS31

Trojan Investment Funds (the "Company"), an open-ended investment company, authorised and regulated by the Financial Conduct Authority ("FCA") in United Kingdom.

Website: www.linkfundsolutions.co.uk, Telephone number: +44 345 608 0950

PRIIP Manufacturer: Link Fund Solutions Limited ("LFSL")

Depository: The Bank of New York Mellon (International) Limited ("the Depository")

What is this product?

Intended Retail Investor: Investments are suitable for retail investors whose investment requirements are aligned with the objectives, policies and risk profile of the Fund

Term: This fund has no maturity date.

Objectives:

To seek to achieve growth in capital (net of fees), ahead of inflation, as measured by the UK Retail Prices Index, over the longer term (over 5 to 7 years). There is no guarantee that the objective will be met or that capital growth will be delivered over any time period and you may get back less than you invest.

To invest globally in a range of asset classes including equities (company shares) and equity related securities (investments whose value is linked to the performance of the shares in one or more companies), bonds (for example, loans to either a company or government that pay interest), money market instruments (for example, short term loans that pay interest), deposits and cash and indirectly in private equity and precious metals (for example, gold). Exposure to these asset classes may be achieved by investing in investment trusts and other funds (including those managed by the Manager, the Investment Manager and their associates). The fund will invest in line with the requirements of the Investment Manager's Climate Change Mitigation Policy (as further described in the Investment Strategy in the prospectus). The Investment Manager's asset allocation decisions will be based on various factors including analysis of economic conditions, interest rates and inflation. The Investment Manager will seek to buy investments which it considers have the ability to grow in value over time. The Investment Manager aims to construct a portfolio for the fund that seeks to promote climate change mitigation through an investment process which assesses a company's alignment to, or commitment to align to net zero greenhouse gas emissions by 2050. Exposure to asset classes will be varied and at times less than 50% of the fund may be invested in these companies. The Investment Manager also assesses the corporate governance practices of companies in which the fund may invest. The asset classes to which this investment process applies are set out in the Investment Manager's Climate Change Mitigation Policy on the Investment Manager's website at www.taml.co.uk. It does not apply to other assets within the fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. In addition to the market price risk, please refer to the fund's prospectus for further information.

If the fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are unable to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Performance Scenarios

Future market performance cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower. What you get will depend on how the market performs and how long you keep the investment.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress Scenario	What you might get back after costs	5 430 GBP	5 580 GBP
	Average return each year	- 45.68 %	- 11 %
Unfavourable Scenario	What you might get back after costs	8 890 GBP	9 150 GBP
	Average return each year	- 11.08%	- 1.76%
Moderate Scenario	What you might get back after costs	10 050 GBP	12 360 GBP
	Average return each year	0.47%	4.32%
Favourable Scenario	What you might get back after costs	11 140 GBP	13 370 GBP
	Average return each year	11.4%	5.98%

What happens if the Company is unable to pay out?

The assets of fund are entrusted to the Depositary. If the fund encounters financial difficulties, the assets entrusted to the Depositary (or its delegates) will not be affected. If the Depositary (or its delegates) encounter financial difficulties, the fund could suffer a loss in some circumstances. Investors may be covered by the Financial Services Compensation Scheme ("FSCS") if the fund is unable to pay out.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed that you invest GBP 10,000 and that in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	618 GBP	1225 GBP
Impact on return (RIY) per year (*)	6.18 %	1.99 %

Composition of costs

			If you exit after 1 year
One-off costs upon entry or exit	Entry fees	5.00% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	500 GBP
	Exit costs	The impact of the costs you pay when exiting your investment. We do not charge an exit fee for this product, but the person selling you the product may do so.	N/A
Ongoing costs	Management fees and other administrative or operating costs	0.86% are incurred each year in managing your investments including those incurred by any underlying investments. The ongoing charges figure is based on expenses as at 31 July 2022.	118 GBP
	Transaction costs	The impact of the costs incurred when we are buying and selling underlying investments for the product.	0 GBP
Incidental costs taken under specific conditions	Performance fees	The Fund does not charge a performance fee.	N/A

How long should I hold it and can I take money out early?

LFSL recommends a minimum holding period of 5 years for investments made into this fund. If you sell your shares before the end of the recommended holding period you may increase the risk of receiving back less than you invested. You can buy and sell shares in the fund on each business day. Please refer to the prospectus for full details.

Recommended holding period: 5 years

How can I complain?

Complaints concerning the operation of any funds offered by LFSL may be referred to the Complaints Department, Link Fund Solutions Limited, PO Box 389, Unit 1, Roundhouse Road, Darlington, DL1 9UF or by email to investorservices@linkgroup.co.uk or by telephone to +44 345 922 0044. A copy of our complaint guide is available on request.

Once we have considered your complaint, you may have the right to refer the matter to the Financial Ombudsman Service ("FOS"). Should you wish to refer a complaint or contact the FOS you may do so at: Financial Ombudsman Service, Exchange Tower, London E14 9SR or by telephone to +44 800 023 4567 (free but charges may apply if called from a mobile) or to +44 300 123 9123, or via their website at: www.financial-ombudsman.org.uk/contact/index.html or e-mail: complaint.info@financial-ombudsman.org.uk.

Other relevant information

Alongside this document, please read the prospectus. Copies of the prospectus, the latest annual and semi-annual reports, as well as the latest published prices of the shares in the fund and other information, including how to buy and sell shares are available on LFSL's website (details below).

You may switch your investment into shares of another sub-fund of the company and a charge might be applied if you do so. For further details please see the sections "Conversion and Switching" and "Fees and Expenses" in the fund's prospectus.

Trojan Investment Funds is an umbrella fund with segregated liability between its funds. Therefore, the holdings of this fund are maintained separately under UK law from holdings of other funds within Trojan Investment Funds, so your investment in this fund will not be affected by any claims against any other fund of Trojan Investment Funds.

The above information and details of the past performance of the fund and the previous performance scenario calculations can be found on the website. The past performance chart shows the share class's performance as the percentage loss or gain per year over the last 4 years. All the information can be found on <https://www.linkfundsolutions.co.uk/uk/troy-asset-management-limited/trojan-investment-funds/trojan-fund/>.

Qualified Investors in Switzerland can obtain the prospectus, the key investor documents for Switzerland, the instrument of incorporation, the latest annual or semi-annual report, and further information free of charge from the representative in Switzerland: Carnegie Fund Services S.A., 11, rue du Général-Dufour, CH-1204 Geneva, Switzerland, web: www.carnegie-fund-services.ch. The Swiss paying agent is: Banque Cantonale de Genève, 17, quai de l'Île, CH-1204 Geneva, Switzerland. The risk indicator and the performance scenarios have been calculated and presented by analogy with the provisions of Regulation (EU) No 1286/201465 and Delegated Regulation (EU) No. 2017/653. In respect of shares offered in Switzerland the place of jurisdiction is at the registered office of the representative in Switzerland. Details of Link Fund Solutions' Remuneration Code are available on www.linkfundsolutions.co.uk. This describes how remuneration and benefits are calculated and identifies persons responsible for awarding the remuneration and benefits. A paper copy is available free on request.
