Baillie Gifford Japanese Fund - Class B GBP Accumulation

Accumulation Shares - ISIN GB0006011133

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy Objective

• The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Policy

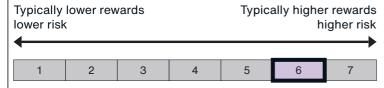

- The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector.
- Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan.
- The Fund may also invest in other transferable securities of Japanese companies and money market instruments.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target.
 There is no guarantee this objective will be achieved over any time period.
- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
- Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.
- For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

BlackRock Continental European Income Fund

Class D Accumulating GBP ISIN: GB00B3S9LG25

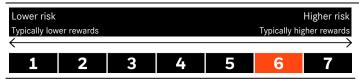

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ► The Fund aims to provide an above average income return from its equity investments (i.e. shares), compared to the income produced by European equity markets (excluding the UK) as represented by FTSE World Europe Ex UK Index, without sacrificing capital growth (i.e. the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment).
- ► The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies domiciled in, or the main business of which is in Europe, excluding the United Kingdom.
- ► The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.
- ▶ The Fund has the flexibility to invest outside of the asset class set out above.
- ► The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE World Europe ex-UK Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ► The lowest category does not mean risk free.
- ➤ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

BlackRock Natural Resources Fund

Class D Accumulating GBP

ISIN: GB00B6865B79

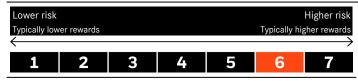

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ► The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets).
- ► The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies whose predominant economic activity is in the natural resources sector which includes, but is not limited to, mining, agriculture and energy.
- ▶ The Fund has the flexibility to invest outside of the asset class.
- ► The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and for efficient portfolio management.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ► The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the S&P Global Natural Resources Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.

FSSA Greater China Growth Fund Class B (Accumulation) GBP

a sub-fund of First Sentier Investors ICVC (the Company)

ISIN GB0033874321

First Sentier Investors (UK) Funds Limited (trading as FSSA Investment Managers), the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the medium to long term (at least three years).

Policy: The Fund invests at least 70% in shares of companies based in or where the majority of their activities take place in China, Hong Kong and Taiwan and that are listed on exchanges worldwide.

The Fund may invest up to 10% in other funds

The Fund will only use derivatives to reduce risk or to manage the Fund more efficiently in limited cases.

Strategy: The Fund's investment strategy is centred on identifying quality companies, buying them at a sensible price and holding for the medium to long term (at least three years). The Manager looks for founders and management teams that act with integrity and risk awareness, and companies with a dominant market position that have the potential to deliver continual and predictable returns over the medium to long term.

Benchmark: The Fund's performance is compared against the value of the MSCI Golden Dragon Index.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within three years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

Risk and reward profile

Lower Risk

Potentially Lower Rewards

Potentially Higher Rewards

 The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRI is calculated using

- representative data.

 The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating
 of 6 due to its past performance (or representative data) and the nature of
 its investments.
- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. Material risks not adequately captured by the SRRI:
- Currency risk: the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- Single country / specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.
- Smaller companies risk: investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.
- China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

FTF ClearBridge Global Infrastructure Income Fund

Class W (acc) GBP-H2 • ISIN GB00BMF7D662 • A sub-fund of Franklin Templeton Funds

The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD"

Objectives and Investment Policy

The Fund's primary aim is to generate income. The Fund also seeks to grow in value by more than the OECD G7 Inflation Index + 5.5%, from a combination of income and investment growth, over five year rolling periods, before all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Core investments

The Fund invests at least 80% of the Fund's assets in a diverse range of shares of companies listed on the stock exchanges of developed countries. Such companies will operate across a variety of infrastructure sub-sectors, which may include gas, electricity, water, toll-roads, airports, rail and communication.

Other investments

The Fund may also invest in:

- · recently issued shares of companies which are not yet listed but which are expected to be listed within 12 months of purchase;
- other transferable securities; cash and cash equivalents;

 money market instruments; and
 other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes. The Fund can use derivatives for efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e g. indices, interest rates, share prices or currencies). Up to 10% of the Fund may be invested in derivatives and recently issued securities.

While the Fund will normally be invested in accordance with the limits set out above, the Investment Manager has the freedom to invest outside of these limits, sometimes significantly, where the Investment Manager considers that, due to prevailing market conditions, it is in the interests of the Fund and its shareholders to do so.

Geographic locations (where we invest)The Fund may invest in companies operating anywhere in the world.
Up to 20% of the Fund's assets may be invested in shares of companies, including depositary receipts (a type of listed security which enables investors to hold shares in foreign companies), issued by companies in emerging markets (countries whose economy and financial markets are still developing).

How we select investments (investment strategy)
This Fund is actively managed, which means that the Investment Manager does not copy a benchmark when selecting investments for the Fund. The Fund usually invests in shares of around 30 – 60 companies, although the Investment Manager may invest in fewer or more companies where it considers this to be in the interests of the Fund.

The Investment Manager selects securities based on their potential return and risk characteristics and role in achieving the Fund's investment objective. The portfolio is not constrained by any market index. The Investment Manager seeks to select infrastructure and utility companies which operate under a regulatory regime, or concession arrangement which provides the Investment Manager with a predictable cash flow and minimum yield. In considering yield, the Investment Manager looks at the dividend yield, the dividend per share expectations over a five year period, and the relationship of a company's dividends and cash flows, over an estimated holding period.

ESG (environmental, social, and governance) factors

The Investment Manager integrates financial and non-financial considerations in its assessment of a prospective investment. In selecting the Fund's investments, the Investment Manager assesses prospective investments against various ESG factors, depending on the sector of the investee company. These ESG factors are used to inform the Investment Manager's wider assessment of the value and financial attractiveness of each potential investment and exposures are adjusted accordingly. The Investment Manager may exclude investments depending on their assessment of ESG factors. In addition, the Investment Manager applies automatic exclusions for investments in certain sectors. For more detailed information about how the Investment Manager considers ESG, and a list of exclusions, please see the investment objective and policy in the prospectus for the Fund, available at www.franklintempleton.co.uk in the "Resources and Literature - "Fund Documents" tab.

Additional Information

- The Fund's performance can be measured against its performance target.
 It can also be measured against the FTSE Global Core Infrastructure 50/50 Index, which provides a broad representation of the listed infrastructure
- You may request the sale of your shares in the Fund on any UK business

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

The income received from the Fund's investments is accumulated and included in the value of the shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is in its risk/reward category because a concentrated investment (the Fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Concentration risk: the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities. Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the

Derivative instruments risk: the risk of loss in an instrument where a small

FTF ClearBridge Global Infrastructure Income Fund

change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance. Foreign currency risk: the risk of loss arising from exchange-rate

fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).

Charges taken from the Fund over a year

Ongoing charges 0.82%

Charges taken from the Fund under certain specific conditions

Performance fee Not applicable

The ongoing charges figure is based on the expenses for the Fund for the year to December 2023 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

ongoing charges figure.
For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds and the Fund's annual report for details on the exact charges made.

Class: Accumulation C

ISIN: GB00B80QG615

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC"); managed by HSBC Global Asset Management (UK) Limited

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: http://www.assetmanagement.hsbc.com.

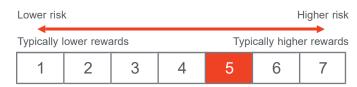

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (equities) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the HSBC Group, to manage day-to-day cash flow requirements.
- The anticipated tracking error for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of derivatives for efficient portfolio management, including hedging. In particular the Fund may use derivatives to help it manage cash flows and dividend payments with the aim of generating returns that are consistent with the Index. The use of derivatives will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

- reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Exchange Rate Risk Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk Investment Leverage occurs when
 the economic exposure is greater than the amount invested,
 such as when derivatives are used. A Fund that employs
 leverage may experience greater gains and/or losses due to the
 amplification effect from a movement in the price of the reference
 source.
- Liquidity Risk Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

Janus Henderson

European Smaller Companies Fund Class I Acc ISIN: GB0007476426

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited. Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of smaller companies, in any industry, in Europe (excluding UK). Companies will be incorporated, headquartered, listed on an exchange in, or deriving significant revenue from, this region.

The Fund may also invest in other assets including cash.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed. The MSCI Europe ex UK Small Cap Index is broadly representative of the companies in which the Fund may invest and can provide a useful comparator for assessing the Fund's performance. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA European Smaller Companies sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The Investment Manager focuses on meetings and calls with company management, along with the use of quantitative filters, to identify potential companies for investment. Emphasis is placed on the robustness of a company's business model, an analysis of what drives the business, its competitive advantages and the sustainability of returns. The Fund maintains a well-diversified portfolio of companies which generally fall within the bottom 25% of their relevant market by way of size. The liquidity of any stock (the degree to which shares can be quickly bought or sold in the market at a price reflecting its intrinsic value) is important in determining whether to invest and the size of the holding for the Fund.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

Jupiter UK Special Situations Fund I-Class

I-Class Accumulation Units, ISIN: GB00B4KL9F89

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide a return, net of fees, higher than that provided by the FTSE All-Share Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies that are bsed in the UK (i. e. are incorporated, headquartered or which conduct a majority of their business activity, in the UK). The Investment Manager seeks to identify special situations where the shares of companies are considered to be undervalued (meaning that their intrinsic value is not reflected in the share price).

Up to 30% of the Fund may be invested in other transferable securities, open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Strategy

The fund manager will apply a disciplined, repeatable process to identify shares of companies which the manager considers to be undervalued. Undervalued stocks are those companies whose worth is not believed to be properly reflected by the stock price. The Fund will tend to invest in a smaller number of companies where the manager has the highest conviction.

Benchmarks

Target benchmark - FTSE All Share Index

The FTSE All Share Index is an industry standard index and is one of the leading representations of UK stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA UK All Companies Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA UK All Companies Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

4

5

• The lowest category does not mean 'no risk'.

2

1

3

- The Fund is in this category due to the nature of its investments and previous levels
 of volatility (how much the value of the Fund rises and falls).
- Pricing Risk Price movements in financial assets mean the value of assets can fall
 as well as rise, with this risk typically amplified in more volatile market conditions.
- Market Concentration Risk (Geographical Region/Country) Investing in a
 particular country or geographic region can cause the value of this investment to
 rise or fall more relative to investments whose focus is spread more globally in
 nature.
- Derivative risk the Fund may use derivatives to reduce costs and/or the overall
 risk of the Fund (this is also known as Efficient Portfolio Management or "EPM").
 Derivatives involve a level of risk, however, for EPM they should not increase the
 overall riskiness of the Fund.
- Liquidity Risk (general) During difficult market conditions there may not be
 enough investors to buy and sell certain investments. This may have an impact on
 the value of the Fund.
- Counterparty Risk the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Scheme Particulars.

Man GLG Japan CoreAlpha Fund Professional Accumulation Shares (Class C)

(ISIN:GB00B0119B50) Man GLG Japan CoreAlpha Fund (the 'Fund') is a sub-fund of Man International ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to provide capital growth by outperforming (net of fees) each of (i) TOPIX Total Return Index ("TOPIX") and (ii) Russell/Nomura Large Cap Value Total Return Index ("RNLCV"), both converted to sterling, in a rolling five year period.
- The Fund will invest at least 80% of its assets in (i) equities of Japanese companies; or (ii) companies which derive a substantial part of their revenues from activities in Japan. The Fund may also invest in other transferable securities, units or shares in collective investment schemes (which may include those managed by the ACD or one or more of its associates), and money market instruments (securities used by governments, companies and others who wish to borrow money for short periods, usually less than a year). The Fund can hold no more than 10% of its assets in any one body corporate (including collective investment schemes). In exceptional market conditions and/or for liquidity management purposes, the Fund may hold a significant amount (or all) of its net asset value in cash and near cash, deposits and government and public securities.
- The Fund is actively managed, meaning that the Investment Manager will use its expertise to pick investments to achieve the Fund's objective. The Investment Manager selects investments from the largest 300 listed companies by market capitalisation listed on the Tokyo Stock Exchange. The Investment Manager's investment process focuses on selecting stocks which it considers to be undervalued based on their Price to Book ratio (which compares a company's share price with the accounting value of its assets ("PBR")) relative to TOPIX. The Fund has a "Value" bias, as opposed to funds which have a "Growth" bias (i.e. invest in companies with high PBRs). The Investment Adviser considers the sector weighting composition

- of the Fund against RNLCV's for portfolio construction and typically aims to stay within \pm 1-15% relative to TOPIX.
- The Fund will expect to hold a small number of positions (usually between 35 to 55 positions).
- Use of financial derivative instruments ("FDI"). The Fund may use FDI (instruments whose prices are dependent on one or more underlying assets) to achieve the investment objective and for efficient portfolio management to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security. The Fund may use currency transaction and techniques to hedge the Fund's currency exposure where securities held by the Fund are denominated in currencies other than the base currency.
- Benchmarks. The Fund is managed with reference to benchmarks. The Fund's performance target (as described above) has been chosen on the basis that the ACD considers it sets a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance) the investment strategy pursued by the Investment Adviser and the assets in which the Fund will principally invest. These benchmarks are also used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- Dealing. Shares can be bought and sold on each Business Day, as detailed in the Fund prospectus.
- Investment Horizon: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Treatment of income. Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

Typically lower rewards

Typically lower rewards

Typically higher rewards

Typically higher rewards

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

• The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
- The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

Global Franchise Fund

A sub-fund of Ninety One Funds Series iv managed by Ninety One Fund Managers UK Limited

Class I Accumulation shares in sterling ISIN: GB00B7VHRM91

Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of companies around the world.

The Fund focuses on investing in companies believed to be of high quality which are typically associated with global brands or franchises.

Investment opportunities are identified using in-depth analysis and research on individual companies.

The Fund may at times invest in a relatively small number of companies. These companies may be of any size and in any industry sector.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The MSCI AC World Net Return Index is used for performance comparison. The Fund does not seek to replicate the index.

The IA Global Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Style Bias: The use of a specific investment style or philosophy can result in particular portfolio characteristics that are different to more broadly-invested portfolios. These differences may mean that, in certain market conditions, the value of the portfolio may decrease while more broadly-invested portfolios might grow.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 May 2023. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

Schroder Asian Alpha Plus Fund

an Authorised Unit Trust of Schröder Unit Trusts Limited

Class Z Accumulation GBP (GB00B5BG4980)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI AC Asia ex Japan (Net Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of Asian companies, excluding Japan.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of Asian companies, excluding Japan.

'Alpha' funds invest in companies in which the investment manager has a high conviction that the current share price does not reflect the future prospects for that business.

The fund benefits from the investment manager's established research capabilities in the Asia (excluding Japan) region that identifies companies with positive cash flow, balance-sheet strength and valuation support.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective

investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC Asia ex Japan (Net Total Return) Index, and compared against the Investment Association Asia Pacific ex Japan sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may

become more difficult to achieve.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Schroder Global Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Q1 Accumulation GBP (GB00BJRSVM82)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI World (Net Total Return) (GBP) Index (after fees have been deducted) over a 3 to 5 year period by investing in equities of companies worldwide.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide. Schroder US Smaller Companies Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B7LDL923)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objective

The fund aims to provide capital growth in excess of the Russell 2000 Lagged (Net Total Return) Index (after fees have been deducted) over a 3 to 5 year period by investing in equities of small-sized US companies.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of small-sized US companies. These are companies that, at the time of purchase, are similar in size to those comprising the bottom 20% by market capitalisation of the North American equity market. The fund may invest in small-sized Canadian companies.

The small cap universe is an extensive, diverse and constantly changing area of the North American market. The investment manager believes smaller companies offer investors exposure to some niche growth areas that, often, cannot be accessed through large companies. They also tend to grow more rapidly than larger companies.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective

investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk and managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the Russell 2000 Lagged (Net Total Return) Index, and compared against the Investment Association North American Smaller Companies sector average return. Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Smaller companies risk: Smaller companies generally carry greater liquidity risk than larger companies, meaning they are harder to buy and sell, and they may also fluctuate in value to a greater extent.

Smaller companies risk: Smaller companies generally carry greater liquidity risk than larger companies, meaning they are harder to buy and sell, and they may also fluctuate in value to a greater extent.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.92%. The fund's annual report for each financial year will include details on the exact charges made including any discounts

Please see the prospectus for more details about the charges.

In case a share class is created after the fund's launch date, a simulated past performance is shown, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 14/02/1990

The shareclass was launched on 10/02/2012.

TM Redwheel Global Equity Income Fund Class R

A sub Fund of the TM Redwheel Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation):

GB00BMBQMY84 ISIN (Income): GB00BMBQN677

Objectives and Investment Policy

The objective of the Fund is to provide a combination of income, net of fees, and long term (over five years) capital growth by investing primarily (over 70%) in a concentrated portfolio of global companies.

The Fund will primarily (over 70%) invest its assets (excluding cash and cash equivalents) in equity and equity linked securities of companies that are listed on a global stock market. The Fund typically holds investments in 30-50 companies. The Fund portfolio is constructed with a wider global view than solely analysing the fundamentals of particular companies based on the Investment Manager's conviction that no company, market or economy can be considered in isolation. This approach concentrates on investing in stocks that, in the opinion of the Investment Manager, offer an attractive value and are issued by companies with good prospects and strong fundamentals. The most attractive stocks for this strategy tend to be those of good quality, cash generative companies with realisable dividend yields. The Fund strategy has an inherent style bias; every holding in a global equity income portfolio has to yield at least 25% more than the broader market (compared to FTSE World Equity Index) at the point of purchase. Any holding whose prospective yield falls below the comparative index yield is sold.

Equity and equity-linked securities include shares, depository receipts, warrants and other participation rights, convertible securities, index and participation notes and equity linked notes. The Fund may also invest, up to 10% of its net assets in collective investment schemes. Collective Investment Schemes may be managed by either the ACD or its associates. Fixed and floating rate debt securities as well as cash and cash equivalents may be held. The Fund may also invest and gain exposure to fixed income instruments, including emerging market and sub-investment grade debt, and convertible securities. GBP is the Fund Currency but assets may be denominated in other currencies. In certain market conditions currency exposure may be hedged. The Fund may invest in financial derivative instruments for hedging and investment purposes. Financial derivative instruments, either exchange traded or OTC, in which the Fund may invest, include, but are not limited to, options, swaps and index futures.

The Fund is actively managed.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of simulated data which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- · This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- · The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- · The lowest category does not mean 'risk free'.
- · This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- · Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- · Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- · Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- · Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Vanguard Global Emerging Markets Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Accumulation ISIN: GB00BZ82ZY13

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

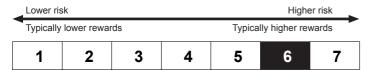

Objectives and investment policy

- The Fund seeks to provide an increase in the value of investments over the long-term (more than 5 years).
- The Fund seeks to achieve its investment objective by investing primarily in shares of companies located in emerging markets around the world. Under normal circumstances, at least 80% of the Fund's assets will be invested in shares of such companies. A company is considered to be located in an emerging market country if it is organised under the laws of, or has a principal office in, an emerging country; if it has a class of securities whose principal securities market is in an emerging country; if it derives 50% or more of its total revenue from goods produced, sales made, or services provided in one or more emerging countries; or if it maintains 50% or more of its assets in one or more emerging countries.
- The Investment Adviser has discretion to determine which countries are regarded as emerging markets, although those classified by the International Monetary Fund (IMF) as emerging or developing economies will typically be included, together with other countries having similar characteristics. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The Fund is an active fund whereby its multi-manager structure comprises three independent sub-investment advisers managing approximately equal portions of the Fund's investments. Each investment adviser uses their expertise to pick investments to achieve the Fund's objectives. The Fund will be constrained by the FTSE Emerging Index (the "Index"), to a limited extent, with regard to its investment in sectors and country exposure. However, whilst the Fund may invest in components of the Index, it is not tracking the Index and the Fund will hold investments that are not components of the Index.
- The Fund typically invests in a diverse range of companies representing different economic sectors and industry groups across the spectrum of large, mid and small cap value securities, chosen mainly on the basis of an investment approach that focuses on analysing individual shares rather than stock markets. The Fund's holdings will comprise a mix of investments in companies whose earnings are expected to grow faster than their peers in the market (known as 'growth stocks') and those that are considered to have been undervalued by the market (known as 'value stocks') selected from the world's emerging markets.
- The Fund may also have exposure to bonds and other fixed income securities, other collective investment schemes (which themselves invest in securities which are consistent with the Fund's objective), money

- market instruments (i.e. investments usually issued by banks or governments that are a short term loan to the issuer by the buyer), deposits, and warrants (which provide the holder with the right, but not the obligation, to purchase a share at a fixed price or amount at a fixed time in the future).
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- · The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The currency of the share class is GBP.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- · Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free"
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Movements in currency exchange rates can adversely affect the return of your investment.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

 Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers
 to allow the Fund to sell or buy investments readily. This could cause the
 Fund to incur higher costs when buying or selling investments or could
 mean that the Fund is not able to buy or sell investments when it would
 like to do so.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at https://global.vanguard.com
