American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

iShares Corporate Bond Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B84DSW83

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the Markit iBoxx GBP Non-Gilts Overall TR Index, the Fund's benchmark index.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the benchmark index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The benchmark index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. These may include fixed income securities which pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

ISIN: GB00B84DY642

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.

- Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.09% for purchases and 0.05% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

Legal & General Global Infrastructure Index Fund Unit Class C GBP Accumulation - ISIN: GB00BF0TZL74

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Global Core Infrastructure Index, the "**Benchmark Index**" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of shares in companies with infrastructure core activities in accordance with the index provider's methodology.
 - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
 - The Fund will have at least 90% exposure (directly or through depository receipts (a certificate issued by a bank representing shares in a foreign company such as American depository receipts and global depository receipts)) to assets that are included in the Benchmark Index.
 - The Fund may also invest in money market instruments (such as treasury bills), depository receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to invest in shares in companies with infrastructure as its core activity as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may invest in countries where investment markets are considered

to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.

- Most of the Fund holds investments from a particular market sector, that of companies within the infrastructure industry. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at January 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.09% for purchases and 0.07% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

Legal & General Short Dated Sterling Corporate Bond Index Fund Unit Class C GBP Accumulation - ISIN: GB00BKGR3F07

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Markit iBoxx GBP Corporates 1-5 Index, the "**Benchmark Index**" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
- The Benchmark Index is comprised of investment grade corporate bonds (a type of loan that pays interest) that are short dated (i.e. up to 5 years in maturity) and denominated in sterling (British Pound).
- The bonds that the Fund invests in will be primarily investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund may also invest in money market instruments (such as treasury bills), cash, deposits, bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund may use derivatives (contracts which have a value linked to the

price of another asset) to:

- reduce risk or cost; or
- generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund may be suitable for investors looking to track the market in investment grade corporate bonds that are short dated and denominated in British Pounds as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00B59G4H82

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE U.K. Equity Income Index (the "Index").
- The Index consists of common shares of companies listed on the London Stock Exchange's main market, that are expected to pay dividends that generally are higher than average.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all constituent shares of the Index in the same proportion as the Index.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing or by telephone. A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Any charges to the investor will be taken from capital, not income. This may increase the level of income paid but will result in capital erosion and will constrain growth.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.
