Legal & General All Stocks Gilt Index Trust Unit Class C GBP Accumulation - ISIN: GB00BG0QNW27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index comprises government or other public bonds (a type of loan that pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
 - The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to invest in bonds issued by the UK government (known as gilts), as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.08%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.04% for purchases and 0.04% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2013.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.

Legal & General UK Index Trust Unit Class C GBP Accumulation - ISIN: GB00BG0QPJ30

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE All Share Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of shares in all eligible companies listed on the London Stock Exchange's (LSE) main market in accordance with the index provider's methodology.
 - The Fund's investments will closely match those that make up the Benchmark Index.
 - The Fund will invest at least 90% (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) in the assets that are included in the Benchmark Index.
 - The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.

The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.59% for purchases and 0.09% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1992.
- This unit class launched in 2013.

Pacific Multi-Asset Accumulator - Conservative Fund

GBP A Accumulating | ISIN: IE00BD6DG945

A sub-fund of Pacific Capital UCITS Funds plc

The Manager is Waystone Management Company (IE) Limited ("the Manager")

The Investment Manager of the Fund is Pacific Capital Partners Limited (the "Investment Manager")

Objectives and Policy

Investment Objective: The Fund's investment objective is to provide capital growth over the long term whilst attempting to limit the risk of capital loss.

Investment Policy: The Fund is considered to be actively managed, which means that the Investment Manager is not constrained by any index or benchmark in the selection of investments. The Investment Manager has discretion in managing the investments of the Fund.

The Fund invests principally in regulated underlying funds, including open-ended exchange traded funds and index tracker funds.

The Fund may also invest directly in certain securities, including fixed income instruments, equities, money market instruments, certificates and closed-ended funds where the Investment Manager believes such direct investment to be more efficient.

The Investment Manager may also seek to pursue a factor based investment strategy to isolate and take exposure to particular factors (value, momentum, carry or size) which drive risk and return within a given asset class or market.

The Fund is a multi-asset fund and may obtain exposure to a broad range of asset classes through its investment in underlying funds,

direct securities and derivatives, including equity markets, fixed income, money markets, indices and currencies.

Exposure to equity markets will range between 20% to 60% of Net Asset Value.

The Fund may use exchange traded and OTC derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the Fund's risk profile. The Fund may also make extensive use of derivatives including more complex instruments or strategies to achieve the investment objective and these may result in leverage. In such situations performance may rise or fall more than it would have done otherwise, reflecting such additional exposure.

Income from the Fund's investments will be reinvested in the Fund.

Investors are able to buy and sell shares in the Fund on any day (except Saturday or Sunday) on which banks are open in Ireland and the UK.

Risk and Reward Profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

Why is the Fund in this category? The lowest category does not mean 'risk free'. The Fund's risk category shown is based on historical data and is not guaranteed. Furthermore, it may not be a reliable indication of the future risk profile of the Fund

The Fund is categorised as a 4 because it is invested in financial markets and uses techniques and instruments which are subject to some level of variation which may result in gains and losses.

Additional risks that may have a significant effect on Fund performance includes:

- **Fund of Fund Risk** – Identifying appropriate underlying funds for investment by the Fund may be difficult and involves a high degree of uncertainty.
- **Credit Risk** – The Fund may be exposed to credit risks with regard to counterparties with whom it trades as well as risks relating to settlement default. Such risks could result in substantial losses.
- **Derivative Risk** – Use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities or more traditional investments.
- **Currency Risk** – Movements in currency exchange rates can adversely affect the return of the Fund. Currency hedging may be used to minimise the effect of this but may not always be successful.
- **Liquidity Risk** – Certain investments and types of investments are subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market and as a result may be subject to wide fluctuations in market value.

The value of the Fund's investments and the shares in the Fund may rise as well as fall and an investor may not get back the amount s/he invests. Any investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The risk category of the Fund is not fixed and may well change over time. A full list of risks applicable to this Fund can be found in the Prospectus and Supplement. See under "Practical Information" for how to obtain a copy.

Charges for this Share Class

The charges you pay are used to pay the operating costs of the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Up to 5.00%
Exit charge	None

Charges taken from the fund over a year

Ongoing charges	1.33%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures that we might take out of your money before it is invested and before we pay out sales proceeds of your investment. In some cases you might pay less and you should speak to your financial adviser about this.

The ongoing charges figure is an estimate based on actual costs over the last year.

The ongoing charges include charges from underlying funds in which the Fund invests, if any.

The annual report for each financial year will include detail on the charges made.

For more information about charges, please see section "Fees and Expenses" of the Prospectus and Supplement.

Past Performance: GBP A Accumulating

Past performance is not a guide to future performance.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Due to effects of unusual market conditions, other risks could be triggered, refer to "Risk Considerations" in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between September 2017 and September 2022.

The moderate scenario occurred for an investment in the product/its benchmark between September 2016 and September 2021.

The favourable scenario occurred for an investment in the product/its benchmark between July 2014 and July 2019.

Recommended holding period: 5 years.

Example Investment: GBP 10,000.

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,040 GBP	6,250 GBP
	Average return each year	-39.60 %	-8.97 %
Unfavourable	What you might get back after costs	9,310 GBP	9,750 GBP
	Average return each year	-6.94 %	-0.51 %
Moderate	What you might get back after costs	10,190 GBP	10,960 GBP
	Average return each year	1.85 %	1.85 %
Favourable	What you might get back after costs	11,890 GBP	13,270 GBP
	Average return each year	18.87 %	5.83 %

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Company design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Company default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	154 GBP	870 GBP
Annual cost impact (*)	1.5%	1.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.4% before costs and 1.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0% of the amount you pay in when entering this investment	0 GBP
Exit costs	We do not charge an exit fee for this Product.	0 GBP
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	1.3% of the value of your investment per year. This is an estimate based on actual costs over the last year.	133 GBP
Transaction costs	0.2% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	21 GBP
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	0 GBP

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product should be considered a medium to long term investment. This means at least 5 years or more. You can sell your shares in the product on any Dealing Day as defined in the Prospectus, by using one of the methods described in the Prospectus. No exit fees will be charged. Vanguard Group (Ireland) Limited ("VGIL")

Call +44 207 489 4305 for more information - <https://global.vanguard.com> - This Key Information Document is dated 10/12/2024.
The Central Bank of Ireland (the "Central Bank") is responsible for supervising VGIL in relation to this Key Information Document.
The Fund is authorised in Ireland and has been registered for sale in other EEA Member States.
VGIL is authorised in EEA Member States and regulated by the Central Bank.
You are about to purchase a Fund that is not simple and may be difficult to understand.

What is this product?

Type: The Fund is a sub-fund of Vanguard Investment Series plc ("VIS"), a UCITS authorised by the Central Bank of Ireland.

Term: The Fund has no fixed maturity date, however it may be terminated in certain circumstances as described in the prospectus of VIS (the "Prospectus") including if the net asset value of the Fund falls below US\$100 million or its equivalent in another currency.

Objectives: The Fund employs a passive management – or indexing – investment approach, through physical acquisition of securities, and seeks to track the performance of the MSCI Emerging Markets Index (the "Index").

The Index is a market-capitalisation-weighted index comprised of large and mid-sized company stocks in emerging markets.

The Fund attempts to:

1. Track the performance of the Index by investing through physical acquisition in all, or substantially all, of the constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.

The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments.

The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.

While the Fund is expected to track the Index as closely as possible, it typically will not match the performance of the targeted Index exactly, due to various factors such as expenses to be paid by the Fund and regulatory constraints. Details of these factors and the anticipated tracking error of the Fund are set out in the Prospectus.

The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on <https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

Income from the Fund will be reinvested and reflected in the price of shares in the Fund.

VIS is an umbrella fund with segregated liability between sub-funds. This means that the holdings of the Fund are maintained separately under Irish law from holdings of other sub-funds of VIS and your investment in the Fund will not be affected by any claims against any other sub-fund of VIS.

Intended retail investor: The Fund is available to a wide range of investors seeking access to a portfolio managed in accordance with a specific investment objective and policy.

The VIS depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.

You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for Vanguard Investment Series plc ("VIS"), along with the latest published prices of shares and other practical information on the Fund from Vanguard Investment Series plc c/o Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329, Ireland or from our website at <https://global.vanguard.com>. These documents are available in English only. The documents are available in English and are free of charge.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other Funds. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency to the base currency of the Fund, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the Fund, including counterparty, index tracking sampling and emerging markets risks.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

This Fund does not include any protection from future market performance so you could lose some or all of your investment.

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political events, economic news, company earnings and significant corporate events.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		GBP 10,000

Favourable	What you might get back after costs	GBP 14,400	GBP 20,600
	Average return each year	44.00%	15.55%

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

This Fund cannot be easily cashed in.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2024.

Moderate scenario: This type of scenario occurred for an investment between 2019 and 2024.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

What happens if VGIL is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of VGIL, the Fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you invest in the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario

- GBP 10,000 per year is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	GBP 27	GBP 157
Annual cost impact (*)	0.3%	0.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.1 % before costs and 3.8 % after costs.

We may share part of the costs with the person selling you the Fund to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.

No redemption fees are imposed in respect of redemptions, however, the Fund may use swing pricing in order to mitigate the effects of dilution on a particular Dealing Day.

How can I complain?

A Shareholder who is not satisfied with their experience as an investor in the Fund is entitled to bring a complaint to the Fund in accordance with the applicable complaints handling policy. Should you wish to lodge a complaint about a Vanguard product or our service, please contact: Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329. Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed ex-UK Index (the "Index").
 - The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
 - The Index is comprised of large and mid-size shares providing coverage of developed markets around the world, excluding the U.K. The Index is a free-float market-capitalisation weighted index derived from the FTSE Global Equity Index Series (GEIS), which covers 98% of the world's investable market capitalisation. Free-float means that only shares readily available in the market are included when calculating a company's weight in a given index and excludes locked-in shares (such as those held by governments). Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
 - The Fund attempts to:
 1. Track the performance of the Index by investing in all constituent shares of the Index in the same proportion as the Index.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
 - The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
 - The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
 - The currency of the share class is GBP.
 - The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
 - The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
 - Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
 - Portfolio transaction costs will have an impact on performance.
 - Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>
- For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC prospectus (the "Prospectus") on our website at <https://global.vanguard.com/>**

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Purpose

This document provides you with key information about this investment Fund. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this Fund and to help you compare it with other funds.

Product

Product: Vanguard Global Bond Index Fund (the "Fund") - Institutional Plus GBP Hedged Acc IE00BPT2BQ43

Vanguard Group (Ireland) Limited ("VGIL")

Call +44 207 489 4305 for more information - <https://global.vanguard.com> - This Key Information Document is dated 10/12/2024.

The Central Bank of Ireland (the "Central Bank") is responsible for supervising VGIL in relation to this Key Information Document.

The Fund is authorised in Ireland and has been registered for sale in other EEA Member States.

VGIL is authorised in EEA Member States and regulated by the Central Bank.

You are about to purchase a Fund that is not simple and may be difficult to understand.

What is this product?

Type: The Fund is a sub-fund of Vanguard Investment Series plc ("VIS"), a UCITS authorised by the Central Bank of Ireland.

Term: The Fund has no fixed maturity date, however it may be terminated in certain circumstances as described in the prospectus of VIS (the "Prospectus") including if the net asset value of the Fund falls below US\$100 million or its equivalent in another currency.

Objectives: The Fund employs a passive management – or indexing – investment approach, through physical acquisition of securities, and seeks to track the performance of the Bloomberg Global Aggregate Float Adjusted and Scaled Index (the "Index").

The Index includes investment-grade bonds from around the world with maturities greater than one year.

The Index is a market-weighted index of global government, government-related agencies, corporate and securitised fixed income investments with maturities greater than one year.

The Fund attempts to:

1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.

The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.

While the Fund is expected to track the Index as closely as possible, it typically will not match the performance of the targeted Index exactly, due to various factors such as expenses to be paid by the Fund and regulatory

constraints. Details of these factors and the anticipated tracking error of the Fund are set out in the Prospectus.

The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on

<https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

Income from the Fund will be reinvested and reflected in the price of shares in the Fund.

VIS is an umbrella fund with segregated liability between sub-funds. This means that the holdings of the Fund are maintained separately under Irish law from holdings of other sub-funds of VIS and your investment in the Fund will not be affected by any claims against any other sub-fund of VIS.

Intended retail investor: The Fund is available to a wide range of investors seeking access to a portfolio managed in accordance with a specific investment objective and policy.

The VIS depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.

You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for Vanguard Investment Series plc ("VIS"), along with the latest published prices of shares and other practical information on the Fund from Vanguard Investment Series plc c/o Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329, Ireland or from our website at <https://global.vanguard.com>. These documents are available in English only. The documents are available in English and are free of charge.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the Fund for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other Funds. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency to the base currency of the Fund, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the Fund, including counterparty, index tracking sampling and investment risks.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

This Fund does not include any protection from future market performance so you could lose some or all of your investment.

The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political events, economic news, company earnings and significant corporate events.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		GBP 10,000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 3 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	GBP 7,920	GBP 8,220
	Average return each year	-20.80%	-6.32%
Unfavourable	What you might get back after costs	GBP 8,510	GBP 8,420
	Average return each year	-14.90%	-5.57%
Moderate	What you might get back after costs	GBP 10,130	GBP 10,490
	Average return each year	1.30%	1.61%
Favourable	What you might get back after costs	GBP 11,030	GBP 11,290
	Average return each year	10.30%	4.13%

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

This Fund cannot be easily cashed in.

Unfavourable scenario: This type of scenario occurred for an investment between 2020 and 2023.

Moderate scenario: This type of scenario occurred for an investment between 2016 and 2019.

Favourable scenario: This type of scenario occurred for an investment between 2018 and 2021.

What happens if VGIL is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of VGIL, the Fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you invest in the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario

- GBP 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 21	GBP 67
Annual cost impact (*)	0.2%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.8 % before costs and 1.6 % after costs.

We may share part of the costs with the person selling you the Fund to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The Fund does not charge an entry fee.	GBP 0
Exit costs	The Fund does not charge an exit fee, but the person selling you the Fund may do so.	GBP 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.10% of the value of your investment p.a. This is an estimate based on actual costs over the last year and takes account of any known future changes.	GBP 10
Transaction costs	0.11% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	GBP 11
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Fund.	GBP 0

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.

No redemption fees are imposed in respect of redemptions, however, the Fund may use swing pricing in order to mitigate the effects of dilution on a particular Dealing Day.

How can I complain?

A Shareholder who is not satisfied with their experience as an investor in the Fund is entitled to bring a complaint to the Fund in accordance with the applicable complaints handling policy. Should you wish to lodge a complaint about a Vanguard product or our service, please contact: Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329. Vanguard Sterling Short-Term Money Market Fund (the "Fund")

A sub-fund of Vanguard® Investments Money Market Funds

Institutional Plus GBP Accumulation Shares

ISIN: GB00BFYDWN66

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide stability in the value of investments, liquidity and exposure to a variety of investments that typically perform differently from one another while maximising income earned from distributions such as interest (as opposed to that derived from an increase in the value of investments).
- The Fund seeks to achieve this objective by investing in short-term money market instruments including but not limited to bank certificates of deposits, commercial papers, corporate and sovereign variable and fixed rate bonds, UK Government bills, short term agreements to purchase / sell securities with an obligation to sell / repurchase the securities back at a later date (referred to as 'repurchase and reverse repurchase agreements') and cash deposits (i.e. a fixed term investment that gathers interest over the period of its term). These types of investments may be issued by both UK and non-UK issuers.
- Non-sterling investments will be limited to 10% of the Fund's portfolio and, as a way to reduce risk, currency derivative contracts will be used to convert these instruments back to sterling at the point of purchase.
- The Fund may invest up to 100% of its investments in money market instruments issued or guaranteed as to principal and interest by the UK government, its agencies or instrumentalities.
- Money market instruments are investments usually issued by banks or governments that are a short term loan to the issuer by the buyer. The buyer receives interest and the return of the original amount at the end of a certain period.
- The Fund is an active fund which means the manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy.
- The performance of the Fund may be compared against the benchmark SONIA Compounded Index. VIUK considers that this benchmark best reflects the investment strategy of the Fund as a means to assess the performance of the Fund.

- The Fund is not recommended for investors seeking an increase in the value of investments over the long-term (more than 5 years).
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund invests in securities which are denominated in currencies other than the listing currency. Movements in currency exchange rates can affect the return of investments.
- This Fund is a short-term variable net asset value money market fund.
- The Fund is appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-MMF.pdf>

For further information about the objectives and investment policy of the Fund please see Appendix 1 of the Vanguard® Investments Money Market Funds Prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 1 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- An investment in a money market fund is not a guaranteed investment. An investment in a money market fund is different from an investment in deposits, as the amount invested in a money market fund is capable of fluctuation. Money market funds do not rely on external support for guaranteeing the liquidity of the money market fund or stabilising the Net Asset Value per share. The risk of loss of the amount invested shall be borne by the investor.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
