KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aegon Ethical Corporate Bond Fund

a sub-fund of Aegon Asset Management UK ICVC

Sterling Class B - Accumulation shares (ISIN: GB00B018K352)

This fund is managed by Aegon Asset Management UK plc ("the authorised corporate director (ACD)").

Objectives and investment policy

Objective: to provide a combination of income and capital growth over any 7 year period.

Policy: The Fund operates an ethical screen which means that the Fund may not invest in particular industries and sectors. In all cases, the investments of the Fund will meet the Fund's predefined ethical criteria.

The Fund will invest at least 80% in a portfolio of investment grade corporate bonds issued anywhere in the world.

Investment grade corporate bonds are bonds issued by companies whose credit rating is deemed to be investment grade, defined as Baa3 or higher by Moody's Investor Services (Moody's) BBB- or higher by Standard & Poor's (S&P) or BBB- or higher by Fitch, or their respective successors or equivalents.

The Fund may also invest up to 10% in high yield corporate bonds issued anywhere in the world.

High yield corporate bonds are considered by the investment manager to be bonds issued by companies whose credit rating is defined as Ba1 or below by Moody's or BB+ or below by Standard and Poor's or BB+ or below by Fitch or their respective successors or equivalents. High yield bonds also include non-rated instruments.

Bond investments will be denominated in Sterling.

The Fund is actively managed and the ACD adjusts the Fund's credit exposure and duration (interest rate risk) based on an analysis of the prevailing economic and market conditions.

Subject to its custom-defined ethical criteria, the Fund will also seek to achieve diversification across individual issuers and sectors when constructing the portfolio.

To the extent that the Fund is not fully invested as set out above, the Fund may also invest in other transferable securities, collective investment schemes (up to 10% of Net Asset Value and which may include schemes managed by the ACD or its affiliates), money market instruments, deposits and cash and near cash. It is intended that investment in any other collective investment schemes will be predominately in approved money market instruments.

Other information

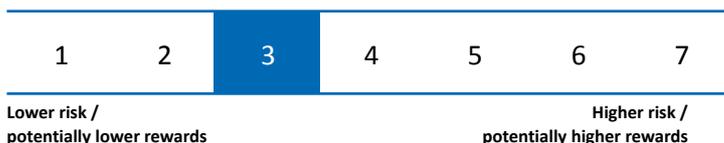

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund is not managed in reference to any index or benchmark

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because bond prices can be affected by political or economic events, changes in exchange rates, and changes in interest rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

Liquidity: The Fund's value may fall if bonds become more difficult to trade or value due to market conditions or a lack of supply and demand. This risk increases where the Fund invests in high yield bonds.

Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.

Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.48%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

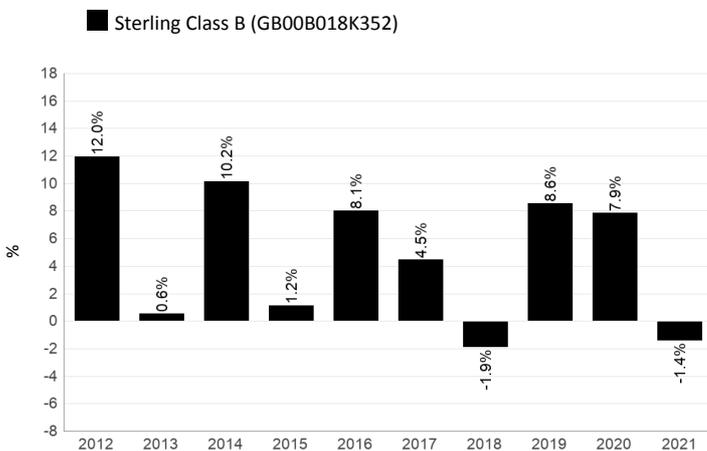

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2021. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Switches or Conversion: 1st 4 in any calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Prospectus.

Practical information

Aegon Asset Management UK ICVC is a UK UCITS scheme structured as an umbrella company with various sub-funds, with segregated liability between sub-funds. This document describes one sub-fund of the UK UCITS; the Prospectus and the Report and Accounts are prepared for the entire UK UCITS.

You can exchange your holdings into another share class of the Fund, or another sub-fund of the UK UCITS, at any time. More detailed information on exchanging can be found in the 'Buying, Redeeming, Switching and Conversion of Shares' section of the Prospectus.

The assets and liabilities of the Fund are segregated by law. Accordingly, the assets of this Fund belong exclusively to it and may not be used to meet the liabilities of, or claims against, any other fund within the Aegon Asset Management UK ICVC. Any liability incurred on behalf of, or attributable to, the Fund shall be discharged solely out of the assets of the Fund.

The depositary is Citibank UK Ltd.

The prices of shares will be published daily on our website (www.aegonam.com).

Further information about the Fund and copies of the Prospectus and the latest Annual and Semi-Annual Report and Accounts can be obtained, free of charge, on our website (www.aegonam.com) or by calling 0800 358 3009. These documents are available in English.

You should be aware that tax legislation in the UK (where the Fund is authorised) may have an impact on your personal tax position.

Aegon Asset Management UK plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

Details of the up to date remuneration policy of Aegon Asset Management UK plc ("the Company") including but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, are available at www.aegonam.com. BMO Responsible UK Income Fund

Share Class: 2 Inc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033144857). This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide income and long-term capital growth.

The Manager seeks to achieve this by investing mainly in UK equities (ordinary shares in companies listed on the UK stock market). The Manager invests only in assets which meet the Fund's ethical screening criteria. The ethical screening applied to the Fund means that a number of the UK's largest companies (those that form part of the FTSE 100 Index) are screened out on ethical grounds. As a result, the Fund will usually include significant exposure to medium and smaller companies.

While the Manager will invest mainly in equities, it may also invest in other investments such as corporate bonds (fixed interest securities issued by companies) and derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities.

Investment is concentrated in UK companies whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regard to the environment or human rights).

The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the FTSE All-Share index, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.

Income is distributed quarterly.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk

Typically higher rewards, higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.

Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.

Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.

Yield Risk: the yield on the FTSE All-Share Index can fall and rise and is not guaranteed.

Charges from Capital Risk: taking the charges from the capital of the Fund to increase the distributable income may impact on capital returns.

Charges

KEY INVESTOR INFORMATION

EDENTREE RESPONSIBLE AND SUSTAINABLE

SHORT DATED BOND FUND

SHARE CLASS B GB00BZ012J01

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate director.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to preserve capital and generate a regular income payable quarterly.

The EdenTree Responsible and Sustainable Short Dated Bond Fund seeks to invest at least 80% in short dated government bonds and debt instruments issued by companies that the manager believes make a positive contribution to society and the environment through sustainable and socially responsible practices.

In line with the Fund's objective to preserve capital, the Fund will aim to invest at least 80% in sterling denominated fixed interest securities of short duration. Portfolio duration will be expected to average around 2 years, with the anticipated upper limit being 3 years. The portfolio will also look to maintain high credit quality. Securities will usually have a minimum credit rating of A by Moody's, S&P and or Fitch to be considered for investment. A maximum of 10% of the holdings may be invested in BBB-rated debt, seeking a target overall portfolio rating of A or better.

The Manager may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, term deposits, nil and partly-paid securities, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions. We assess a diverse set of indicators of a company's approach to sustainability during our screening process. Further details of EdenTree's Responsible and Sustainable Investment Policy are available on request or can be downloaded from our website at www.edentreeim.com.

Further details of EdenTree's Responsible and Sustainable Investment Policy which are available on request or can be downloaded from our website at www.edentreeim.com.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

This Fund is marketable to retail investors and will be managed in line with the requirements for inclusion in an Individual Savings Account (ISA) but is not available for direct investment in our stocks and shares ISA.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 2 as its price has experienced nominal rises and falls historically based on simulated data.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- The issuer of a financial security held within the Fund may not pay income or repay capital to the Fund when due. The value of a security may be affected by the general state of the economy and market perception of the risk of default.

More details on all of the risks mentioned above can be found in the full Prospectus.

First Sentier Global Listed Infrastructure Fund Class B (Accumulation) GBP

a sub-fund of First Sentier Investors ICVC (the Company)

ISIN GB00B24HJL45

First Sentier Investors (UK) Funds Limited, the authorised corporate director of the Company

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve an investment return from income and capital growth over the medium to long term (at least three years).

Policy: The Fund invests in shares of companies that are involved in infrastructure around the world and are listed on exchanges worldwide.

The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports, marine ports and oil and gas storage and transportation.

The Fund does not invest directly in infrastructure assets.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Fund's managers strategy is to invest in a globally diversified portfolio of listed infrastructure companies.

The Fund manager's investment strategy is founded on the principle of stewardship, allocating capital to what it believes are good quality companies with sound growth prospects and strong management teams. It seeks to engage actively and constructively with company leaders on sustainability and other investment risks and opportunities.

Benchmark: The Fund's performance is compared against the value of the FTSE Global Core Infrastructure 50/50 Index and the Fund is included in the Investment Association's Infrastructure Investment Association Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

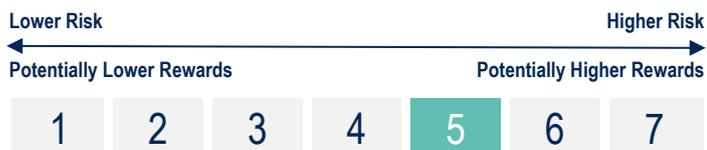

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within three years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
 - **Single sector risk:** investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
 - **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
 - **Listed infrastructure risk:** the Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.
- For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

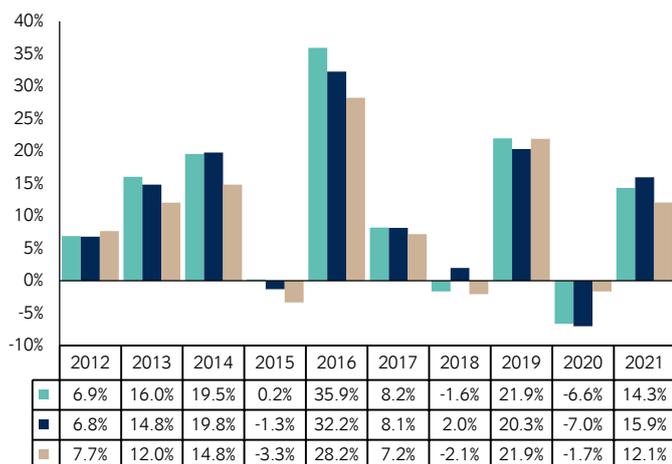

The ongoing charge is based on expenses for the year ending July 2021. It may vary from year to year. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

The Fund may also invest in currencies, cash and cash equivalents. Issuers of these securities may be located in any country, including emerging markets. "Positive Tilt" is described further in the section headed "ESG Integration and Sustainable Investing Approaches"

The Fund may invest up to 100% in government and public securities. The Fund may also invest in below investment grade and unrated debt securities.

The Fund may invest up to 10% of its assets in onshore PRC securities including China A-Shares through the China-Hong Kong Stock Connect Programmes and onshore debt securities issued within the PRC through China-Hong Kong Bond Connect.

Allocations may vary significantly and the Fund may be concentrated in, or have net long or net short exposure to, certain asset classes, industry sectors, markets or currencies from time to time.

Securities exhibiting positive ESG characteristics are selected through the use of proprietary research and third-party data. The assessment process has 2 steps: 1) the exclusionary framework, 2) the identification of securities exhibiting positive ESG characteristics.

Step 1: The Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms based criteria. The exclusion policy for the Fund is available at www.jpmmorgan.co.uk/investor.

Furthermore, the Investment Manager will not have long exposure in indices where 30% or more of the underlying securities are on the

exclusions list. In addition to this rule, the aggregate long exposure via derivatives to excluded securities will not exceed 5% net equity exposure and this exposure will be monitored to ensure alignment to the exclusion policy. Measuring the exposure involves assessing the price sensitivity of the derivatives to changes in the price of the underlying securities.. Step 2: Through applying a defined set of ESG scoring criteria, the Investment Manager, invests at least 70% of long sovereign debt exposures and 70% of long individual company equity exposures in securities exhibiting positive ESG. In addition to this minimum requirement, positive ESG characteristics are also identified according to the Investment Manager's proprietary assessment of a company / issuer's management of ESG issues relevant to the specific industry, activity or country and exposure to areas such as climate risk, green transport and infrastructure, social advancement and health and wellness.

The Investment Manager carries out a proprietary assessment of ESG criteria to identify any risks and opportunities of potential investments across debt securities and equities. The assessment is based on proprietary internal research and incorporates external insights as well as dedicated ESG analysis and scoring from third-party providers. Such assessment generally includes, without limitation, an analysis of issuer regulatory filings, annual reports, websites, direct and regular communication with issuers, media, third-party research and data providers and government officials, economic surveys and reports. This analysis and the relevant data is inputted into the Investment Managers proprietary assessment and informs investment decisions. The proprietary assessment is ongoing and the Investment Manager continually reviews the holdings against the ESG criteria.

Other investment exposures Small capitalisation companies and collective investment schemes.

Derivatives Used for: investment purposes, efficient portfolio management; hedging. Types: see [Fund Derivative Usage table under How the Funds Use Derivatives, Instruments and Techniques](#). TRS including CFD: 28% expected; 105% maximum. Global exposure calculation method: absolute VaR. Expected level of leverage from derivatives: 500% indicative only. Leverage may significantly exceed this level from time to time.

Currencies Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: flexible.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income.

Portfolio Transaction Costs A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmmorgan.co.uk/kiid-glossary.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its Net Asset Value has shown medium fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Ruffer Diversified Return Fund, I Accumulation, a fund within LF Ruffer Managed Funds (ISIN: GB00BMWQLQW82)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To achieve a positive return (an increase in value of the fund) with a focus on capital preservation in all market conditions after all costs and charges have been taken, over any 12 month period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest globally, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in the following asset classes: equities (company shares), bonds (loans to either a company or government that usually pay interest), alternative investments (property and precious metals), money market instruments (which are short term loans that pay interest) and cash. As part of the equity exposure, the fund may invest in Investment Trusts. Investment in open-ended funds is limited to 10% of total assets by value.

The Investment Manager seeks to create a balanced portfolio by investing in both protective assets, such as bonds, derivatives and cash, and growth assets, such as equities. The Investment Manager seeks to identify opportunities where the potential rewards outweigh the potential risks through analysis of a company's markets, product/service offering, competitive position, financial strength and competence of its management.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund may invest in other funds (including those managed by the Manager, the Investment Manager and their associates).
- The fund will not invest directly in alternative assets, but by using for example other funds.
- The fund can invest across different geographic regions, industry sectors and market capitalisations without limitation.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of the fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Changes in Interest Rate Risk: A rise in interest rates generally cause bond prices to fall.
- Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Liquidity Risk: The fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the fund.
- Alternative Investment Risk: The fund may invest in other investment vehicles to gain indirect exposure to alternative assets such as property and precious metals. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- For full details of the fund's risks, see prospectus from the address in 'Practical Information' overleaf.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.93%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is capped at 0.93% until further notice. This figure may vary from year to year. If the cap was not in place, the uncapped estimated ongoing charges figure would be 0.96% based on fund launch estimates. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution adjustment (an adjustment to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about the dilution adjustment and other charges, please see the prospectus Sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Because the share class has less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance.
- The fund was launched in September 2021.
- The share class was launched on 1 September 2021.

LIONTRUST

SUSTAINABLE FUTURE DEFENSIVE MANAGED FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Defensive Managed Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Inc class (ISIN: GB00BMN90635). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver income and capital growth over the long term (5 years or more).

Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund will invest globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- Allocations to equities, fixed income, and cash will vary over time depending on market circumstances. Asset allocation limits will remain in line with the following asset allocation ranges:
 - Equity – 20-50%
 - Fixed income – 10-60%
 - Cash – 0-20%
- The Fund may invest in collective investment schemes including other Liontrust Funds (up to 10% of Fund assets), other transferable securities, money market instruments, warrants, and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

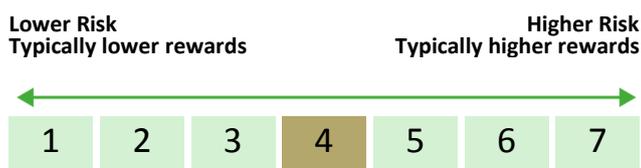

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The Fund can invest in equities, bonds and cash.
- For equities, the process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency, Improved Health and Greater Safety and Resilience) and 20 themes within these. The team then invests in well-run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of idea generation, there are three further criteria all holdings have to satisfy:
 - Broader sustainability: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity.
 - Financial modelling and valuation: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- For the fixed income process, macroeconomic analysis determines the managers' top-down view of the world and this helps shape portfolio construction and appetite for risk. After this, the managers aim to focus on high-quality issuers and believe this can reduce bond specific risk. Assessment of quality is a distinctive part of their process, combining traditional credit analysis with a detailed sustainability assessment based on their proprietary model.
- The managers seek the best-value bonds from high-quality issuers across the capital structure, along the maturity curve and issued in primary credit markets (UK, US and Europe).
- The Fund's asset allocation is based on long-term risk/return profiles of equities, bonds and cash. The managers then tactically adjust these exposures within predefined ranges to enhance overall investment returns. Tactical positioning is driven by analysis of leading economic indicators and then an assessment of asset class valuations relative to both their own history and to each other.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 4 because funds of this type have experienced medium to high rises and falls in value in the past.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- Fluctuations in interest rates are likely to affect the value of the bonds and other fixed-interest securities held by the Fund. If long-term interest rates rise, the value of your shares is likely to fall.
- The Fund can invest in derivatives. Derivatives are used to protect against currencies, credit and interest rates move or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund has holdings which are denominated in currencies other than Sterling and may be affected by movements in exchange rates.

Consequently the value of an investment may rise or fall in line with the exchange rates.

- Investments in emerging markets may involve a higher element of risk due to less well regulated markets and political and economic instability.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Exit charge	None

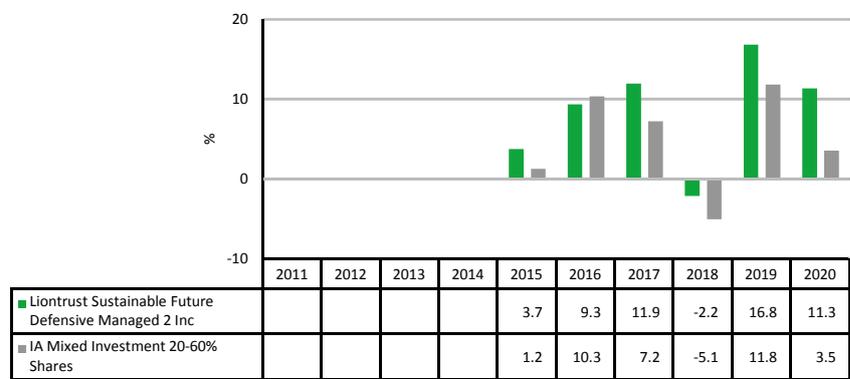

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	0.89%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launched on 23 July 2014.
- The 2 Inc share class was launched on 23 July 2014.
- The base currency of the Fund is pounds sterling.

DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Global Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Acc class (ISIN: GB0030030067). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The Fund will typically invest 95% (minimum 90%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- Investments in emerging market securities will be limited to 20%.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
 - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
 - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily due to its exposure to global equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

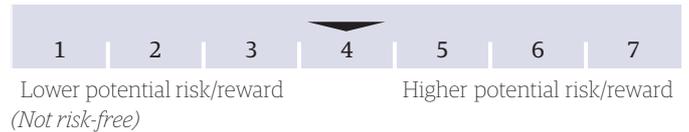

- Alcohol manufacturing
- Carbon-intensive industries
- Human rights abuses
- Alcohol retail
- Poor employment practices
- Nuclear power
- Animal welfare violations
- Polluting the environment
- Pornography
- Armaments
- Gambling
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Schroder Global Sustainable Value Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited
Class I Accumulation GBP (GB00B019KQ13)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The Fund aims to provide capital growth in excess of the MSCI World (Net Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria.

Investment policy

The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria (please see the Fund Characteristics section of the prospectus relating to the Fund). The Fund typically holds 30 to 70 companies.

The Fund focuses on companies that have certain "Value" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the manager believes have been undervalued by the market.

The Fund maintains a higher overall sustainability score than the MSCI World (Net Total Return) index, based on the Investment Manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the prospectus relating to the Fund.

The Fund does not invest in certain activities, industries or groups of issuers above certain limits listed under "Exclusion thresholds" in the Fund Characteristics section of the prospectus relating to the Fund.

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria (please see the Fund Characteristics section of the prospectus relating to the Fund).

The Fund may invest in companies that the Investment Manager believes will

improve their sustainability practices within a reasonable timeframe, typically up to three years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the website.

<https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/>

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to section 6 of Appendix I of the Prospectus).

Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) index, and compared against the MSCI World Value (Net Total Return) Index and the Investment Association Global sector average return.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the

investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the values of any particular investor.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2021 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.79%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Schroder Sustainable Bond Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class L Accumulation GBP (GB00BDD27793)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide income and capital growth in excess of the ICE BofA Sterling 3-Month Government Bill Index plus 2.5% (after fees have been deducted) over any three to five year period, by investing directly in fixed and floating rate securities issued by governments, government agencies and companies worldwide which meet the investment manager's sustainability criteria.

Investment Policy

The fund is actively managed and invests at least 80% of its assets directly, in fixed and floating rate securities denominated in sterling (or in other currencies and hedged back into sterling) issued by governments, government agencies, supra-national and corporate issuers worldwide, (including emerging markets and less developed markets), which meet the investment manager's sustainability criteria (please see the Fund Characteristics section of the prospectus for more detail).

The fund maintains a positive absolute sustainability score based on the investment manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the prospectus.

The fund does not directly invest in certain activities, industries or groups of issuers above certain limits listed under "Sustainability Information" on the fund's webpage, accessed via

www.schroders.com/en/lu/private-investor/gfc.

The fund invests in companies that have good governance practices, as determined by the investment manager's rating criteria (please see the Fund Characteristics section of the prospectus for more details).

The investment manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details

on the investment manager's approach to sustainability and its engagement with companies are available on the website

www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/disclosures.

The fund may invest up to 50% of its assets in below investment grade securities as measured by Standard & Poor's or an equivalent credit rating agency, or in unrated securities.

The fund may invest up to 40% of its assets in asset-backed securities, specifically whole business corporate loans, and covered bonds.

The fund may also invest directly or indirectly in securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds) and money market instruments and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently (for more information please refer to section 6 of Appendix I of the prospectus). The fund may use leverage and take short positions.

Benchmark

The fund's performance should be assessed against its target benchmark of the ICE BofA Sterling 3-Month Government Bill Index plus 2.5% and compared against the Investment Association Sterling Strategic Bond sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria. The fund may underperform other funds that do not seek to invest based on such criteria. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the values of any particular investor.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Glossary: You can find an explanation of some of the terms used in this document at www.schroders.com/ukinvestor/glossary.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmarks have been selected because the Investment Manager and the Manager believe that these benchmarks are a suitable comparison for performance purposes given the fund's investment objective and policy.

Stewart Investors Worldwide Sustainability Fund Class B (Accumulation) GBP

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the long term (at least five years).

Policy: The Fund invests in shares of companies around the world and that are listed on exchanges worldwide.

The Fund may invest in both developed and emerging market countries. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

The Fund invests in shares of high quality companies which are positioned to benefit from, and contribute to, sustainable development.

Investment decisions around high quality companies are based on three key points:

◦ Quality of management including integrity, attitude to environmental and social impacts, corporate management, long term performance and risk.

◦ Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices.

◦ Quality of the company's finances and their financial performance.

Sustainability is a key part of the approach.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Manager's investment strategy is founded on the principle of stewardship, allocating capital to high quality companies with sound growth prospects and strong management teams. The Manager's investment style is inherently long-term and conservative, seeking to buy and hold high quality companies that can deliver acceptable returns over the long-term (at least five years).

Benchmark: The Fund's performance is compared against the value of the MSCI AC World Index and the Fund is included in the Investment Association's Global Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

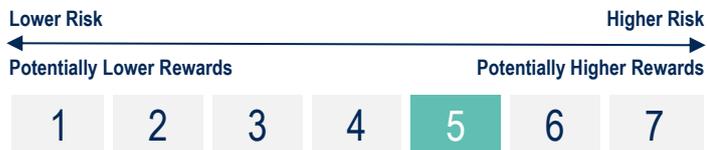

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

Risk and reward profile

• The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRRI is calculated using representative data.

• The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.

• We cannot guarantee that the rating of the share class will remain the same; it may change over time.

• Even the lowest rating 1 does not mean a risk free investment.

• On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the

nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.

• Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

• The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

• **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

• **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

TM Fulcrum Diversified Core Absolute Return Fund Class C GBP

A sub Fund of the TM Fulcrum UCITS Funds

This Fund is managed by Tutman LLP

ISIN (Accumulation): GB00BRTNY847 ISIN (Income): GB00BRTNY391

Objectives and Investment Policy

The investment objective of the Fund is to aim to achieve long-term absolute returns of inflation + 3% to 5% in all market conditions over rolling five year annualised periods, with lower volatility than equity markets. In doing so the Fund aims to achieve a positive return on a rolling three year basis. However, a positive return is not guaranteed and a capital loss may occur. Investors should be aware that the investors' capital is, in fact at risk, and there is no guarantee that these returns will be achieved, whether over rolling five year periods, or any time period.

In seeking to achieve its investment goal, the Fund will hold a diversified portfolio, typically consisting of equities, commodity related instruments, fixed income and cash either directly or indirectly through the use of derivatives. Investments may be made through collective investment schemes (including index funds such as exchange traded funds (ETFs) and actively managed funds managed by the Investment Manager). Indirect exposure to commodities may be sought through investment in transferable securities, eligible index derivatives and collective investment schemes.

The Fund will use derivatives for investment purposes and for efficient portfolio management. Such use of derivatives may therefore, at times, increase the volatility of the Fund's NAV and change the risk profile of the Fund. The Fund will use hedging strategies to reduce risk over the short time without materially altering its risk profile. The Fund will be managed with a forward looking volatility cap of 12%. Inflation will be measured by reference to the Retail Prices Index. Investments in collective investment schemes will not exceed 10% of the Fund's assets in aggregate.

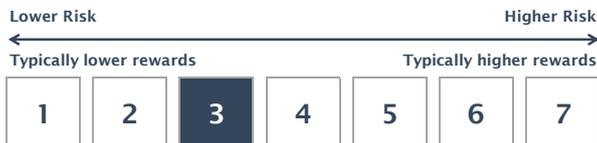

The Company uses the UK Retail Price Index (RPI) for performance comparison purposes only and the benchmark is not a target benchmark and the Company is not constrained by it.

The index has been selected as a benchmark for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 3 due to the volatility of the Fund price which sits in a range of between 2% and 5%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
