KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aegon Ethical Equity Fund

a sub-fund of Aegon Asset Management UK ICVC

Sterling Class B - Accumulation shares (ISIN: GB0007450884)

This fund is managed by Aegon Asset Management UK plc ("the authorised corporate director (ACD)").

Objectives and investment policy

Objective: to provide a combination of income and capital growth over any 7 year period.

Policy: The Fund will invest in equities of companies which are listed, quoted or traded in UK markets or which have their headquarters or a significant part of their activities in the UK but which may also be quoted on a regulated market outside of the UK.

The Fund operates an ethical screen which means that the Fund may not invest in particular industries and sectors. In all cases, the investments of the Fund will meet the Fund's predefined ethical criteria. Set out in Appendix D of the Prospectus

The Fund is actively managed and can invest in companies of any market capitalization (small, medium or large) and in a range of industry sectors, subject to the Fund's ethical criteria. The Fund will typically invest in publicly quoted companies although it will tend to have a bias towards small and medium companies.

At any one time, the scope of investment may be themed by industry, size or style to take advantage of opportunities identified by the ACD.

To the extent that the Fund is not fully invested in the main asset class listed above, the Fund may also invest in other transferable securities, collective investment schemes (up to 10% of Net Asset Value and which may include schemes managed by the ACD or its affiliates), money market instruments, deposits and cash and near cash. It is intended that investment in any other collective investment schemes will be predominately in approved money market instruments.

Derivatives can be used for efficient portfolio management (including hedging to reduce currency risk).

Non-Sterling exposure will typically not be hedged back to Sterling.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund is not managed in reference to any index or benchmark

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because share prices can change quickly and unpredictably, for example due to political or economic events.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Liquidity: The Fund's value may fall if shares, especially those of smaller companies, become more difficult to trade or value due to market conditions or lack of supply and demand.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.77%
Charges taken from the fund under certain specific conditions	
Performance fee	None

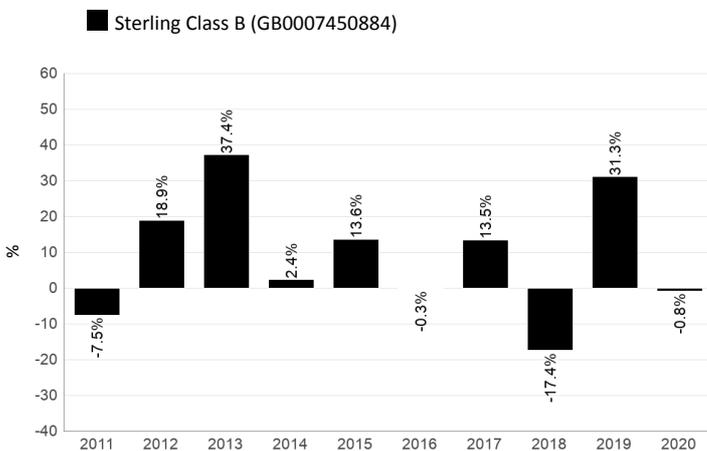

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2020. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Switches or Conversion: 1st 4 in any calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Prospectus.

Past performance

Past performance is not a guide to future performance.

Fund launch date: 17 April 1989

Share class launch date: 17 April 1989

Performance is calculated in GBP.

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.

Note: On 7th September 2020 the name of the Fund changed from Kames Ethical Equity Fund to Aegon Ethical Equity Fund.

Practical information

Aegon Asset Management UK ICVC is a UK UCITS scheme structured as an umbrella company with various sub-funds, with segregated liability between sub-funds. This document describes one sub-fund of the UK UCITS; the Prospectus and the Report and Accounts are prepared for the entire UK UCITS.

You can exchange your holdings into another share class of the Fund, or another sub-fund of the UK UCITS, at any time. More detailed information on exchanging can be found in the 'Buying, Redeeming, Switching and Conversion of Shares' section of the Prospectus.

The assets and liabilities of the Fund are segregated by law. Accordingly, the assets of this Fund belong exclusively to it and may not be used to meet the liabilities of, or claims against, any other fund within the Aegon Asset Management UK ICVC. Any liability incurred on behalf of, or attributable to, the Fund shall be discharged solely out of the assets of the Fund.

The depositary is Citibank Europe plc, UK Branch.

The prices of shares will be published daily on our website (www.aegonam.com).

Further information about the Fund and copies of the Prospectus and the latest Annual and Semi-Annual Report and Accounts can be obtained, free of charge, on our website (www.aegonam.com) or by calling 0800 358 3009. These documents are available in English.

You should be aware that tax legislation in the UK (where the Fund is authorised) may have an impact on your personal tax position.

Aegon Asset Management UK plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

Details of the up to date remuneration policy of Aegon Asset Management UK plc ("the Company") including but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, are available at www.aegonam.com. A paper copy will be available free of charge upon request at the registered office of the Company.

BMO Responsible UK Income Fund

Share Class: 2 Inc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033144857). This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide income and long-term capital growth.

The Manager seeks to achieve this by investing mainly in UK equities (ordinary shares in companies listed on the UK stock market). The Manager invests only in assets which meet the Fund's ethical screening criteria. The ethical screening applied to the Fund means that a number of the UK's largest companies (those that form part of the FTSE 100 Index) are screened out on ethical grounds. As a result, the Fund will usually include significant exposure to medium and smaller companies.

While the Manager will invest mainly in equities, it may also invest in other investments such as corporate bonds (fixed interest securities issued by companies) and derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities.

Investment is concentrated in UK companies whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regard to the environment or human rights).

The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the FTSE All-Share index, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.

Income is distributed quarterly.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk

Typically higher rewards, higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.

Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.

Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.

Yield Risk: the yield on the FTSE All-Share Index can fall and rise and is not guaranteed.

Charges from Capital Risk: taking the charges from the capital of the Fund to increase the distributable income may impact on capital returns.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charges figure is at 30/04/2021

It excludes:

FP WHEB Sustainability Fund, a sub-fund of FP WHEB Asset Management Funds

Class C Accumulation Shares (GBP) (ISIN GB00B8HPRW47)

Class C Income Shares (GBP) (ISIN GB00BHBFFN03)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The aim of the Fund is to achieve capital growth over 5 years.

Policy:

- The Fund will invest at least 80% of its assets in shares in companies anywhere in the world in sectors identified by the investment manager as providing solutions to sustainability challenges. There is no predetermined focus on business sector or geography, although concentrations will naturally emerge through stock selection.
- Under normal circumstances, the Fund will hold cash on deposit up to 10% of the value of the Fund.
- The Fund may also invest in other transferable securities (such as shares, debentures, government and public securities and warrants), funds, money market instruments* and near cash (which are non-cash assets that are highly liquid and easily converted to cash, such as savings accounts, certificates of deposit and treasury bills).
- The Fund may use derivatives (contracts where the value is linked to the expected future price movements of an underlying asset) for efficient portfolio management (to reduce costs and/or the overall risk of the Fund).
- Individual investments are selected through a research process that analyses individual shares. The investment manager selects shares in companies that provide solutions to sustainability challenges falling within certain sustainable investment themes ("Sustainable Investment Themes") that include but are not limited to: (1) cleaner energy, (2) environmental services, (3) resource efficiency, (4) sustainable transport, (5) water management, (6) education, (7) health, (8) safety and (9) well-being. At least half of the company's revenues must be derived from businesses with a positive impact related to the Fund's Sustainable Investment Themes. The Sustainable Investment Themes may change from time to time and further information on the Sustainable Investment Themes is available on the investment manager's website (<http://www.whegroup.com/investment-strategy/>) or otherwise directly from the investment manager.
- Additionally, the investment manager reviews the environmental, social and governance ("ESG") quality of a business as part of its investment process. The investment manager's research considers the robustness of risk management systems, governance processes, the extent of any involvement in controversial issues or activities and overall company alignment with sustainability issues and themes. Based on this analysis, the investment manager assesses the company's quality and suitability for the fund. If the company is, in the investment manager's view, exposed to excessive reputational risk, or has significant activity in areas that are not consistent with the investment philosophy of the fund, then it is unlikely to be selected for investment.
- The investment manager will regularly monitor the companies in which the Fund invests against the above sustainable investment criteria. If it is the investment manager's opinion that an investee company no longer meets the sustainable investment criteria, the investment manager will not make any further investments

in the company and will seek to realise its investment in such a company in an orderly fashion.

- Further information on the investment manager's responsible investment policy is available on the investment manager's website (<http://www.whegroup.com>).

Benchmark:

MSCI World Index

- For the purpose of providing comparable indicative returns only, investors should refer to the MSCI World Index (the "Index"), which is used as a comparator benchmark.
- The Index is used a comparator benchmark, because it is the most recognised measure of global equity returns.

Investment Association's (IA) IA Global sector peer group ("Peer Group")

- Reference to the performance of the global equity funds peer group, is also a relevant comparator benchmark included in the Fund's reporting to compare the Fund's performance against the performance of other funds pursuing a similar objective.
- However, neither the Index nor the Peer Group is used to constrain the construction of the portfolio or investment management decisions. Given the Fund's particular objective, the Fund's holdings typically have a very low level of overlap with either the MSCI World Index or the Peer Group. It is therefore not appropriate to categorise the Index as a target benchmark against which performance of the Fund is set or constraining benchmark which constrains the portfolio composition of the Fund. Instead the Index is used as a comparison tool to give context for the performance of the Fund. The ACD retains the option of adding additional comparator benchmarks in the future, where it is felt that it would be valuable for investors to have additional measures against which to compare the Fund.

Other information:

- We carry out investors' requests to buy, sell or switch at midday on each working day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next working day.
- If you hold accumulation shares, income from investments in the Fund will be rolled up into the capital assets of the Fund.
- If you hold income shares, income from investments in the Fund will be paid out to you once a year.
- Class C Accumulation and Income Shares are denominated in Sterling.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *A money market instrument is a type of investment that is usually issued by banks or governments and is a short term loan to the issuer by the buyer. The buyer receives interest and the return of the original amount at the end of a certain period.

Risk and reward profile

← Lower Risk
Typically lower rewards

Higher Risk →
Typically higher rewards

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.
- The Fund appears as a "6" on the scale. This is because it invests in the shares of companies, whose values tend to vary more widely. The indicator does not take account of the following risks of investing in the Fund:
- The Fund invests in shares and the value of these investments may go up and down. Investors may not get back the original amount invested.

- The Fund will only invest in companies which fit the themes of clean energy, water, pollution abatement and healthcare which means there will be a limited number of companies worldwide which fit these themes. This limitation may constrain growth in the Fund and the Fund may experience a higher level of volatility than funds which invest in the broader market universe.

- A portion of the Fund's assets may be invested in smaller companies. This investment can involve more risk than investing in larger, more established companies. Shares in smaller companies are often not as easy to sell as shares in larger companies are. This can cause difficulty in buying, valuing and selling those shares. Also, reliable information for deciding their value or the risks may not be available.

- Stock market prices, currencies and interest rates can move irrationally and can be affected unpredictably by diverse factors, including political and economic events.

- There is a risk that third parties that the Fund enters into investment contracts with fail to meet their obligations and the Fund may suffer a loss.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available from the ACD at FundRock Partners Limited - WHEB Asset Management, PO Box 10449, Chelmsford, CM99 2UU or, during normal business hours on 01268 44 8234.

GLOBAL SUSTAINABLE EQUITY FUND

Class I Acc ISIN: GB00B71DPP64
Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson Sustainable/Responsible Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in any industry, in any country. The Fund will invest in companies whose products and services are considered by the investment manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy. The Fund will avoid investing in companies that the investment manager considers to potentially have a negative impact on the development of a sustainable global economy.

The Fund may also invest in other assets including cash.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI World Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Global sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager looks to construct a differentiated and well diversified global portfolio of companies, based on the belief that superior

returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The Fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Sustainable Investment The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/ unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

Charges taken from the Fund over a year

Ongoing Charges	0.84%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 31 March 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in July 1991 and the share class was launched in July 2012.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

*Class I Acc was launched in July 2012. Performance prior to that date is simulated past performance based on the Class I Inc of the same fund which reflects the same ongoing charge, which is currently 0.84%.

LIONTRUST

SUSTAINABLE FUTURE EUROPEAN GROWTH FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future European Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Acc class (ISIN: GB0030029390). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long-term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies which are incorporated, domiciled, listed or conduct significant business in the EEA or Switzerland. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The Fund may also invest a maximum of 5% in UK listed securities.
- The Fund will typically invest 95% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
 - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
 - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily due to its exposure to European (ex UK) equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sarasin Responsible Global Equity, a sub-fund of Sarasin Funds ICVC Class P Accumulation Shares

ISIN:GB00B8369M57

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund (through increases in investment value and income) over a rolling 5 year period after deducting fees and costs.

Investment Policy

We invest at least 80% of the Fund in the shares of large and medium sized companies from around the world. We may also invest in cash or bonds or units in funds (including funds managed by Sarasin).

The fund is actively managed. We carefully select the Fund's investments and have free choice to select companies from any country/region, sector or industry. We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries, and will shape the world in which we live and invest. We select ethical (socially responsible) companies based on our own analysis of which are most likely to benefit from our themes, and are well placed to grow their revenues and cash flows as a result of them.

We avoid companies that are materially engaged in certain sectors, including the production or distribution of tobacco, alcohol, armaments, gambling and adult entertainment.

We favour organisations that fulfil an environmentally or socially beneficial role and that employ high standards of governance.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

The Fund's performance can be assessed by reference to the MSCI All Countries World Daily Index (Net Total Return) as it represents the performance of shares of companies from around the world.

Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- **Counterparty and Settlement Risk:** The fund may enter into derivative transactions in over-the-counter markets, which will expose the fund to the credit risk of their counterparties. The fund may be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the relevant contract. In the event of the bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the fund seeks to enforce its rights.
- **Derivatives** can only be used to manage the fund more efficiently in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income. Although this may not be achieved and may create losses greater than the cost of the derivative.
- **Emerging Market Risk:** Emerging markets may face more political, economic or structural challenges than developed markets and shares may be less liquid, meaning that investments may not be sold quickly enough to prevent or minimize a loss; they may therefore involve a higher risk than investing in developed markets.
- The fund has charges deducted from capital. This may reduce the potential for growth.

Charges

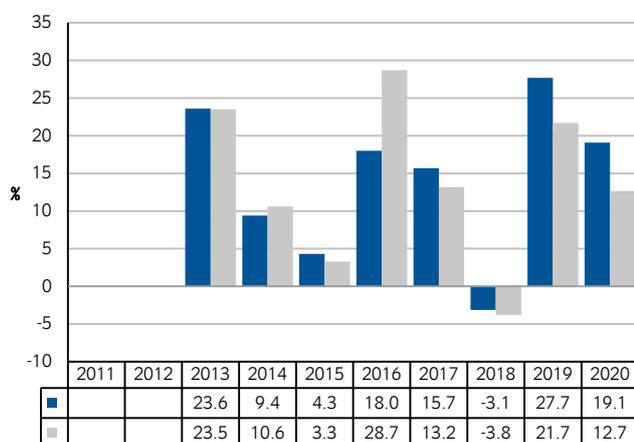

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	No charge
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.	
Charges taken from the Fund over a year	
Ongoing charges	0.97%
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

The ongoing charges figure is based on expenses for the year ending 31.12.2020. This figure may vary from year to year. It excludes: portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling in another fund.

For more information about charges, please refer to the relevant sections of the Prospectus available at www.sarasinandpartners.com

Past Performance

- Past performance is not a guide to future performance, prices may fluctuate and you may not get back your original investment.
- The performance figures include all ongoing charges and exclude any entry charges or exit charges.
- The past performance was calculated in GBP on a net asset value basis with gross dividends reinvested.
- The Fund was launched on 01/06/2011
- This Share Class was launched on 15/10/2012
- The benchmark of this fund has changed over time. Please visit www.sarasinandpartners.com/docs/global/benchmarkhistory for a full history.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the long term (at least five years).

Policy: The Fund invests in shares of companies based in or where the majority of their activities take place in the Asia Pacific region excluding Japan.

The Fund invests in shares of high quality companies which are positioned to benefit from, and contribute to, sustainable development.

Investment decisions around high quality companies are based on three key points:

- Quality of management including integrity, attitude to environmental and social impacts, corporate management, long term performance and risk.
- Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices.
- Quality of the company's finances and their financial performance.

Sustainability is a key part of the approach.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Manager's investment strategy is founded on the principle of stewardship, allocating capital to good quality companies with sound

growth prospects and strong management teams. The Manager's investment style is inherently long-term and conservative, seeking to buy and hold high quality companies that can deliver acceptable returns over the long-term (at least five years).

Benchmark: The Fund's performance is compared against the value of the MSCI AC Asia Pacific ex Japan Index.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4.00%
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the long term (at least five years).

Policy: The Fund invests in shares of companies around the world.

The Fund may invest in both developed and emerging market countries. Emerging market countries are those which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

The Fund invests in shares of high quality companies which are positioned to benefit from, and contribute to, sustainable development.

Investment decisions around high quality companies are based on three key points:

- Quality of management including integrity, attitude to environmental and social impacts, corporate management, long term performance and risk.
- Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices.
- Quality of the company's finances and their financial performance.

Sustainability is a key part of the approach.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Manager's investment strategy is founded on the principle of stewardship, allocating capital to good quality companies with sound growth prospects and strong management teams. The Manager's investment style is inherently long-term and conservative, seeking to buy and hold high quality companies that can deliver acceptable returns over the long-term (at least five years).

Benchmark: The Fund's performance is compared against the value of the MSCI AC World Index and the Fund is included in the Investment Association's Global Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

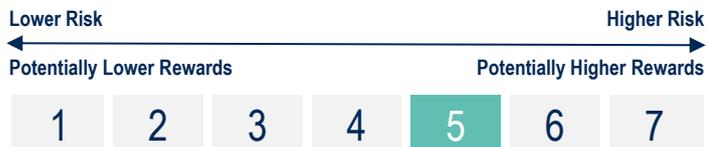

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the

nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4.00%
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.67%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

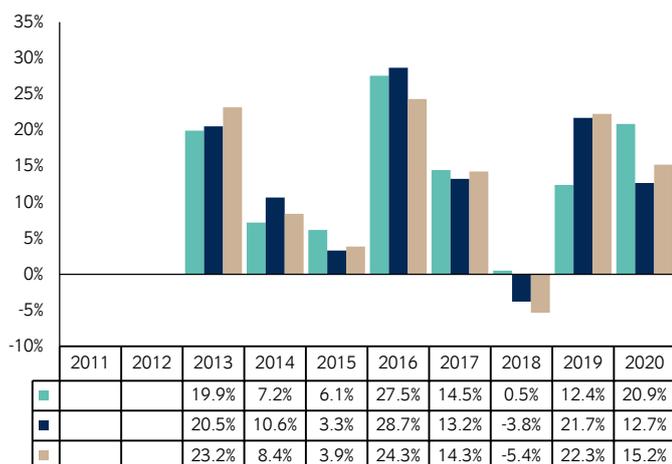

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. An estimate is being used as some expenses payable by the share class were reduced by the investment manager with effect from 1 July 2020. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any. The next Company annual report for the financial year will include detail on the exact charges made.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

Supplementary Information Document

What is the Supplementary Information Document?

The Supplementary Information Document (SID) contains practical and useful information about investing in funds through The Private Office (TPO).

The SID is relevant to the funds you have chosen to invest in and should be read together with the Key Investor Information Document (KIID).

For further information about the funds themselves, please refer to the KIID or prospectus which can be obtained from our website or by contacting us at the address below.

All information contained in this SID is accurate at the time of publication. However, we recommend that you visit <http://www.theprivateoffice.com/site-services/key-investor-information> for the very latest information.

What if I change my mind?

In most cases you can exercise a right to cancel by withdrawing from the contract. In general terms you will normally have a 30 day cancellation period for a life, pure protection, payment protection or pension policy and a 14 day cancellation period for all other policies.

If you choose to exercise your right to cancel an investment contract, please be aware that you might not get back the full amount invested if the value of your investment has fallen.

Please note that certain types of contract and transactions do not attract cancellation rights – you will be advised of the situation pertaining to your investments in advance of commencement of any policies.

Financial Services Compensation Scheme (FSCS)

FSCS cover depends on the nature of the claim being made. In general terms, FSCS cover is not available on claims for loss of value resulting just from the poor performance of investments. However, cover may be available for claims against authorised firms for loss arising from bad investment advice, poor investment management or misrepresentation.

Most types of investment business are covered up to a maximum limit of £85,000. This depends on the type of business and the circumstances of the claim. Long-term insurance business is covered to 100% of the claim, without any upper limit.

For further information about the compensation scheme arrangement, please see:
