Allianz UK & European Investment Funds - Allianz Strategic Bond Fund Share Class C (Inc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB00B06T9362

Objectives and Investment Policy

The Fund aims to maximise total return primarily through investment directly in debt securities or by gaining exposure indirectly through the use of derivatives. The Fund will invest globally although at least 80% of its assets shall be invested in GBP denominated (or hedged back to GBP) debt securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest up to 100% of the Fund's assets into conventional fixed income securities and indirectly through the use of derivatives. Up to 50% of the fund's assets may be in high yield securities and unrated securities of similar credit quality. More than 35% of the value of the property of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United States of America. Up to 30% of the fund's assets may be in China via RMB currency

exposure. We may also invest up to a maximum of 10% of the Fund in collective investment schemes. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day by 12:00.

We usually distribute the income of the fund on a semiannual basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Derivatives may be used to a large extent to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be

subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.63%
-----------------	-------

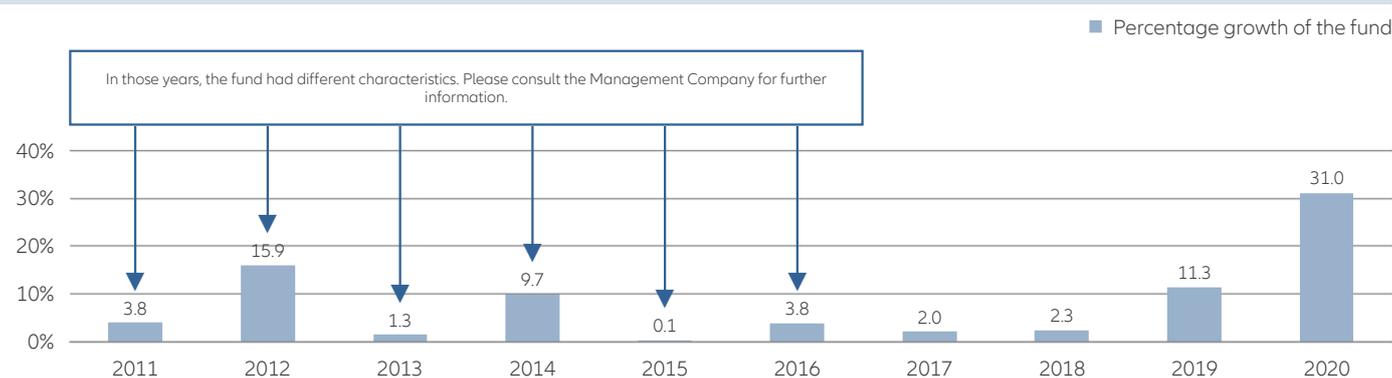

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 31.08.2020. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

Past performance is not a reliable guide to future performance. The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge. The fund was launched in 2002.

The performance of the fund is calculated in GBP.

In 2016 there was a material change of the fund's objectives and investment policy. The previous performance was achieved under circumstances that no longer apply.

Baillie Gifford Strategic Bond Fund - Class B Shares

Income Shares - ISIN GB0005947741 (also representative of Accumulation Shares ISIN GB0005947857)

This Fund is a sub-fund of Baillie Gifford Bond Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to produce monthly income. Opportunities for capital growth are also sought, subject to prevailing market conditions.

Policy

- The Fund will invest at least 80% in a diversified portfolio of (1) investment grade and (2) sub-investment grade bonds, issued by corporate issuers, public bodies and supranationals, and (3) developed market government bonds.
- The fund may also invest in other bonds.
- The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling.
- Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk.
- The Fund will be actively managed through bond selection and strategic asset allocation.

Other Information

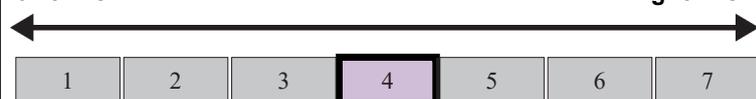

- Bonds are a type of investment which can be issued by governments, companies and other organisations when they want to borrow money. The issuer of the bond owes the holder a debt. The issuer is obliged to pay interest and/or repay the debt at a later date.
- Sub-investment grade bonds typically mean the risk of non-payment is high.
- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases. The Fund is classified in the category above because it invests in corporate bonds which generally provide higher rewards and higher risks than other investments such as government bonds and cash. The indicator does not take into account the following relevant material risks:
- Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
- Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
- Bonds issued by companies and governments may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests may not be able to pay the bond income as promised or could fail to repay the capital amount.
- The Fund's concentrated portfolio relative to similar funds may result in large movements in the share price in the short term.
- Derivatives may be used to obtain, increase or reduce exposure to assets and may result in the Fund being leveraged. This may result in greater movements (down or up) in the price of shares in the Fund. It is not our intention that the use of derivatives will significantly alter the overall risk profile of the Fund.
- In certain circumstances it can be difficult to buy or sell the Fund's holdings and even small purchases or sales can cause their prices to move significantly, affecting the value of the Fund and the price of shares in the Fund.
- Market values for securities which are difficult to trade may not be readily available, and there can be no assurance that any value assigned to them will reflect the price the Fund might receive upon their sale. Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund. The figure for the current financial period has not yet been determined.
- Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of the Fund and the distributions paid by the Fund to shareholders.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

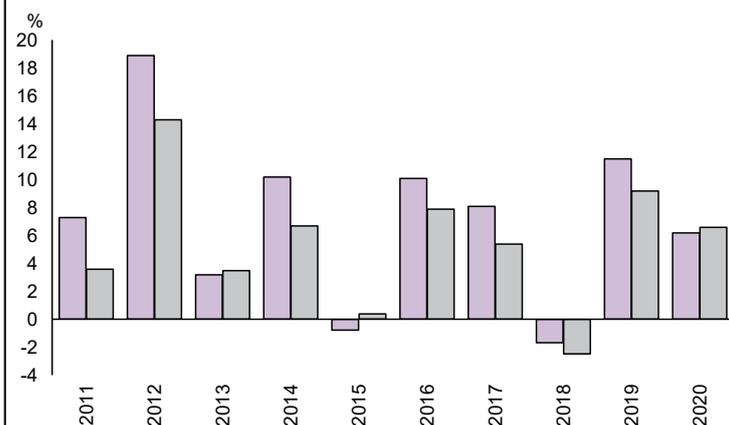

Ongoing charges	0.52%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Income Shares and is at 31/03/2021.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Real Return Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8GG4B61)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To achieve a rate of return in sterling terms that is equal to or above a minimum return from cash (1 month GBP LIBOR) + 4% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, capital is in fact at risk and there is no guarantee that this will be achieved over that, or any, time period.

POLICY

The Fund will:

- invest anywhere in the world;
- follow a broad 'multi-asset' portfolio approach (e.g. company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash);
- invest in bonds, issued by governments and companies, with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- gain exposure to currencies, commodities (e.g. gold) and property through stock exchange listed investments and/or derivatives;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- limit investment in other collective investment schemes to 10%.

The Fund may:

- invest in emerging markets;

- invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body;
- invest in Contingent Convertible Securities (CoCo's); and
- invest significantly in cash and cash-like investments.

Benchmark: The Fund will measure its performance before fees against 1 month GBP LIBOR +4% per annum over five years as a target benchmark (the "Benchmark").

LIBOR is the average interbank interest rate at which a large number of banks on the London money market are prepared to lend one another unsecured funds denominated in British pounds sterling. The Fund will use the Benchmark as a target for the Fund's performance to match or exceed because, in typical market conditions, it represents a target that will be equal to or greater than UK inflation rates over the same period and is commensurate with the Investment Manager's approach.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: net income from investments will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

1 2 3 4 5 6 7

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 4 because its historical value has shown moderate volatility. With a Fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Performance Aim Risk:** The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.
- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small

movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/ money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Liquidity Risk:** The Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund's ability to sell the asset or to sell the asset at its current value.
- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk:** The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

- **China Interbank Bond Market and Bond Connect risk:** The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.
- **CoCo's Risk:** Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- **Investment in Infrastructure Companies Risk:** The value of investments in Infrastructure Companies may be negatively impacted by changes in the regulatory, economic or political environment in which they operate.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Fidelity Global Dividend Fund

a sub-fund of Fidelity Investment Funds

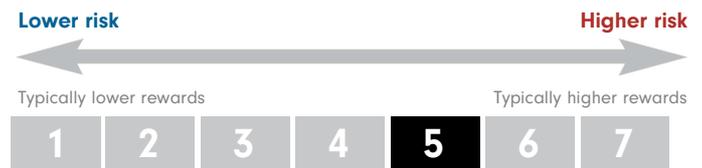

W Income Shares (ISIN: GB00B7778087)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund aims to increase the value of your investment, with low volatility versus the MSCI All Country World (Net Total Return) Index. It also seeks to pay you an income that is at least 25% more than the income produced by the companies included in the index.
- The fund will invest at least 70% in companies globally.
- The remainder will be invested in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The Investment Manager will choose investments which it believes offer attractive income in addition to increasing their share price.
- The fund is actively managed without reference to a benchmark.
- The fund has full discretion in its choices of investments within its objectives and policies.
- Income from the fund is either paid out to you or it is used to buy you more shares in the fund.
- As the fund aims to generate an income, some charges will be taken from the fund rather than the income generated by the fund. This means the amount payable as income may be increased and the potential to increase the value of your investment may be reduced.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

Charges for this fund (ISIN: GB00B7778087)

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure is based on expenses for the year ending 28/02/2021. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 30/01/2012. This class was launched on 15/10/2012. Past performance has been calculated in GBP.

The performance of the Benchmark is also included in the graph for comparative purposes.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*'; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

FRANKLIN TEMPLETON

FTF ClearBridge Global Infrastructure Income Fund

Class X Accumulation (Hedged)

ISIN: GB00BD3FVT86

A sub-fund of: Franklin Templeton Funds II (the "Company")

Managed by: Franklin Templeton Fund Management Limited, part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to provide income. Growth of the fund's value in the long term is a secondary goal. The fund seeks to outperform, on an average annualised basis, the OECD G7 Inflation Index by 5.5% over an investment time frame of 5 years (gross of fees).

Investment Policy

- The fund invests at least 80% of its assets in shares of global listed infrastructure companies. However the fund may hold more or less of other permitted assets in extreme market conditions.
- The fund invests in a number of infrastructure sectors such as gas, electricity and water utilities, toll roads, airports, rail and communications.
- The fund invests in shares of infrastructure companies from around the world, including up to 20% from emerging market countries.
- The fund will usually invest in a concentrated portfolio, typically 30 to 60 companies.
- The fund may also invest up to 10% in global infrastructure companies that are not presently listed on an exchange, but are expected to be listed within 12 months of purchase, and in derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest in derivatives to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging transactions can expose the share class to additional risks which may result in loss to your investment.

Benchmark: The performance target to outperform the OECD G7 Inflation Index by 5.5%, on an average annualised basis over an investment time frame of 5 years, was chosen as it sets a reasonable performance target benchmark for the fund to achieve, taking into account a number of factors such as the measure of inflation across the G7 countries. Please refer to the prospectus for further information.

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark does not constrain the investment manager's management of the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments

in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The investment manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Charges from capital: The fund's fees and expenses may be taken from its capital (rather than income). This will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.85%
Charges taken from the fund under certain specific conditions	
Performance fee:	none

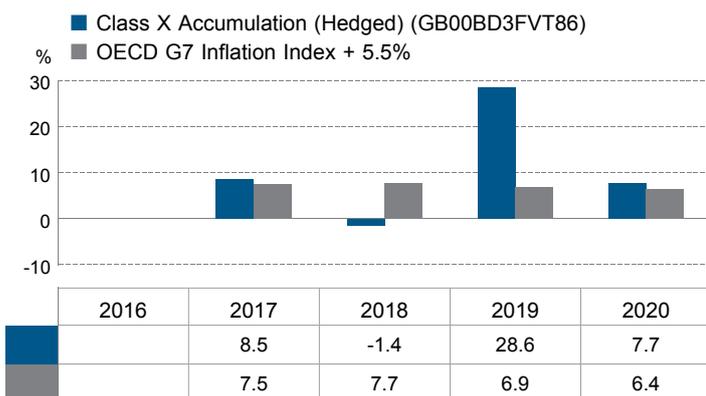

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2020. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 1 July 2016 and the share class began issuing shares on 7 September 2016.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.

Further information on the fund's performance is available at www.franklintempleton.com.

Jupiter Japan Income Fund I-Class

I-Class Income Units, ISIN: GB00B6QC0Z69

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide income together with the prospect of capital growth in order to provide a return, net of fees, higher than that provided by the TOPIX Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies based in Japan. Up to 30% of the Fund may be invested in other assets, including shares of companies based anywhere in the world, open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy

The fund manager takes a fundamental approach to selecting individual securities in order to construct a portfolio which gives investors broad exposure to Japanese equities.

The fund manager will apply a disciplined process to identify shares of companies which are well-managed, have competitive advantage and have the ability and willingness to grow shareholder pay-outs over time.

The Fund will tend to invest in a carefully selected number of companies where the manager has the highest conviction.

Benchmarks

Target benchmark – TOPIX Index

The TOPIX Index is an industry standard index and is one of the leading representations of Japanese stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA Japan Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Japan Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this share class will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- All the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- The value of income payments will fluctuate.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

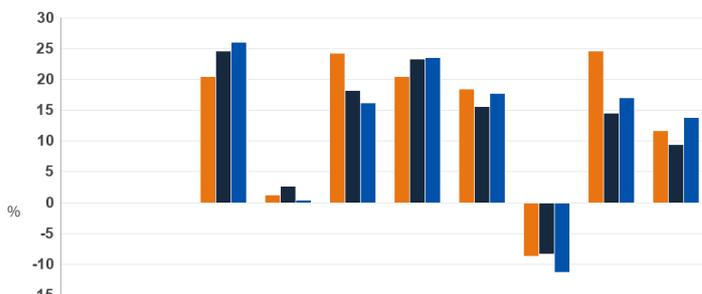

Ongoing charges	0.98%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). A change to the Fund's charging structure took effect on 29/05/2020. The ongoing charges figure with effect from that date is fixed. The annual report and accounts for the Fund will include details of the exact charges made.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Man GLG Income Fund Professional Income Shares (Class D)

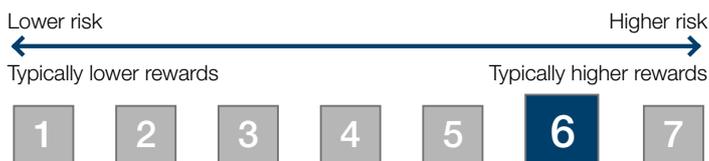

(ISIN:GB00B0117D35) Man GLG Income Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to achieve a level of income (gross of fees) above the FTSE All Share Total Return Index ("FTSE Index") over 1 year rolling period and to outperform (gross of fees) the FTSE Index over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in equities that either have: (i) their registered office in the UK; (ii) carry out a predominant proportion of their business activity in the UK market; and/or (iii) are listed on a UK stock exchange.
- The Fund may invest in equities which are equities other than those meeting the criteria described above, American Deposit Receipts ('ADR') and other equity linked instruments including (without limitation) exchange traded or "over the counter" (traded via broker-dealer network) financial derivative instruments (instruments whose prices are dependent on one or more underlying asset) such as stock options, equity swaps and contracts for differences. The Fund may also invest in transferable money market securities (including certificates of deposit, commercial paper and bankers acceptances), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares and other fixed income investments. Furthermore, the Fund may also hold liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund. Fixed income investments may be issued by any government, company or international agency.
- The Investment Adviser uses the FTSE Index as a guide for selecting assets for the Fund, however the Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
- *Use of financial derivative instruments ("FDI")*. The Fund may use FDI extensively to achieve the investment objective and for efficient portfolio management purposes to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- *Benchmarks*. The Fund is managed with reference to benchmarks. The Fund's performance targets (as detailed above) have been chosen on the basis that the ACD considers them to set a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance): (i) the investment strategy pursued by the Investment Adviser, and (ii) the assets in which the Fund will principally invest. Whilst the Investment Adviser may deviate from the FTSE Index, in terms of holdings selection, the index is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing*. Shares can be bought and sold on each Dealing Day, as detailed in the Fund prospectus.
- *Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income*. Income earned on investments will be distributed to investors as an income payment.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward

profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage (investing borrowed money). These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective. A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.90%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

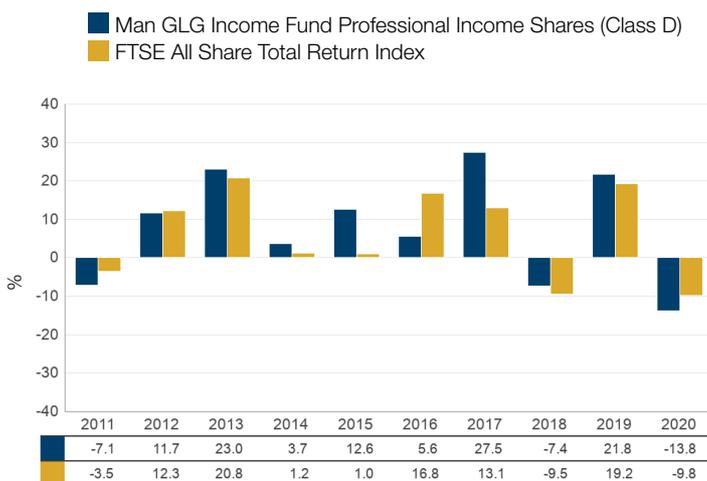

The ongoing charges figure is based on expenses for the year ending 28/02/2020.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2004. This share class was launched on 25 May 2004.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- The Fund is not an index-tracker and does not seek to track the index shown in the past performance chart. The index performance data is shown for illustration purposes only.

Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.

Premier Miton Multi-Asset Monthly Income Fund – Class C Shares

A sub-fund of Premier Miton Multi-Asset Fund 2

Class C Income Shares, ISIN no.GB00B7GGPC79 (representative share class) & Class C Accumulation Shares, ISIN no.GB00BTHH0D93

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The aim of the Fund is to provide a high level of income from a portfolio of investments, paid to you each month.

The Fund will mainly invest in a broad range of funds from different investment groups. These underlying funds will invest in a range of different assets including bonds, company shares, property and alternatives assets and which can cover the world's stockmarkets. The Fund may also hold other types of investment, including company shares, structured investments and fixed income assets.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

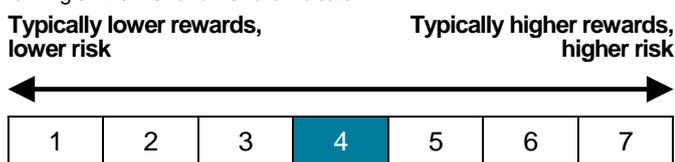

Income shares: any income made by the Fund will be paid out to you.

Funds: a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

Structured investments: are typically investments which are linked to the performance of one or more underlying instruments or assets such as securities, currencies and other financial instruments. They frequently provide an augmented fixed return in exchange for accepting a degree of risk, for instance to market falls or gains.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as 4 because funds and portfolios holding similar assets have experienced medium rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests include equities which, as an asset class, tend to experience higher volatility but in the Fund this is tempered by diversification across other asset classes with lower volatility, such as corporate bonds.

The level of income is not guaranteed and may not be achieved.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Credit risk:** if the issuer of an underlying security is unable to make income payments or to repay its debt.
- **Liquidity risk:** during difficult market conditions some underlying securities, such as property or emerging market equities, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; the Fund does not currently hold any securities which have suspended redemptions.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

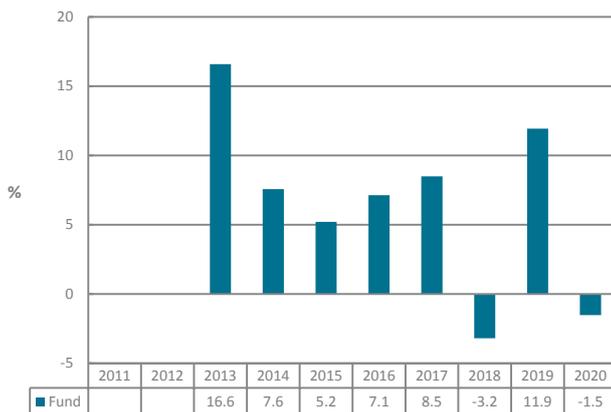

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	1.49%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are units/shares of another fund).
- For more information about charges, please refer to the Fund's prospectus.
- For the Ongoing Charge, the figure was calculated as at 30/04/2021.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 05/01/2009.
- Share/unit class launch date: 05/11/2012.
- Performance is calculated in GBP.

Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

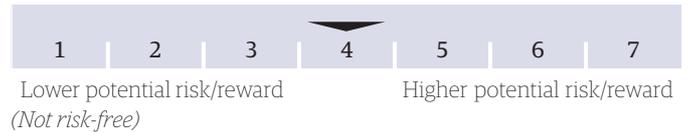

- Alcohol manufacturing
- Carbon-intensive industries
- Human rights abuses
- Alcohol retail
- Poor employment practices
- Nuclear power
- Animal welfare violations
- Polluting the environment
- Pornography
- Armaments
- Gambling
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 31 March 2021.

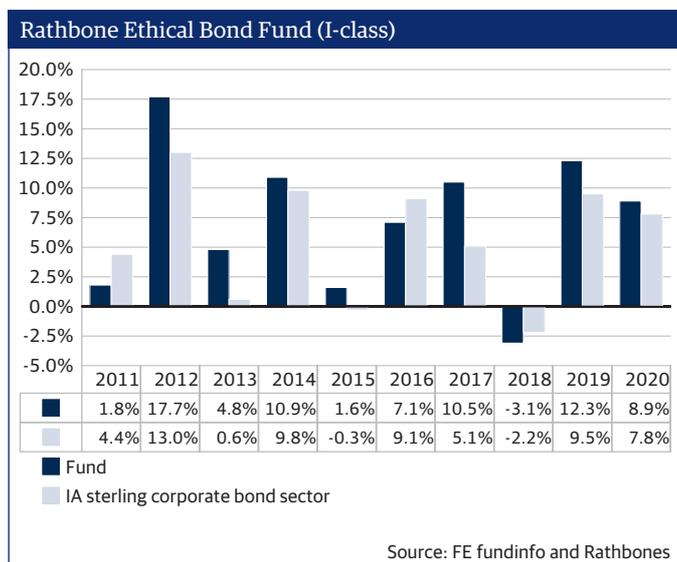

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.65% (Acc units); 0.65% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: bid to bid, net income reinvested.

Fund inception: 14 May 2002. I-class units were launched 1st March 2012. Performance is based on the prices for R-class units prior to that date.

Past performance should not be seen as an indication of future performance.

Schroder Asian Income Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Income GBP (GB00B559X853)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide income and capital growth in excess of the MSCI AC Pacific ex Japan (Net Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of Asia Pacific companies excluding Japan but including Australia and New Zealand.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of Asia Pacific companies, excluding Japan but including Australia and New Zealand, which offer dividend payments.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC Pacific ex Japan (Net Total Return) index, and compared against the Investment Association Asia Pacific ex Japan sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class pays income received from the fund's investments to you half yearly.

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier

markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges 0.93%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2020 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail share classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this share class of the fund is 0.92%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Performance achieved between 2013 and 2014 was achieved under circumstances that no longer apply. The fund name and charges changed on 24 March 2014.

Further information: You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly reports and the latest price of units from www.schroders.com/ukinvestor and from Schroders, PO Box 1402, Sunderland, SR43 4AF, England, telephone 0800 182 2399. They are in English, free of charge.

Tax legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Umbrella fund: This fund is a sub-fund of an umbrella fund, the name of which is at the top of this document. The prospectus and periodic reports are prepared for the entire umbrella fund. To protect investors, the assets and liabilities of each sub-fund are segregated by law from those of other sub-funds.

Switches: Subject to conditions, you may apply to switch your investment into another share class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration policy: A summary of Schroders' remuneration policy and related disclosures is at www.schroders.com/remuneration-disclosures. A paper copy is available free of charge upon request.

The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the investment manager and the manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Trojan Income Fund, X Income, a fund within Trojan Investment Funds (ISIN: GB00BZ6CQ176)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To seek to achieve income with the potential for capital growth in the medium term (3 to 5 years). There is no guarantee that the objective will be met or that income or capital growth will be delivered over any time period and you may get back less than you invest.

Investment Policy

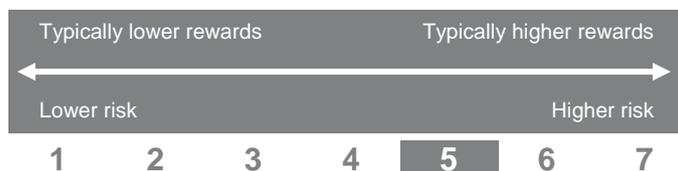

To invest at least 80% of its assets in UK equities (company shares). The fund may also invest in overseas equities, bonds (for example, loans to either a company or government that pay interest), money market instruments (for example, short term loans that pay interest), deposits and cash and indirectly in private equity and property. Exposure to these asset classes may be achieved by investing in investment trusts and other funds (including those managed by the Manager, the Investment Manager and their associates).

The Investment Manager's investment decisions will be based on an assessment of various factors including the potential for dividend growth and growth in cash flow and profits. The Investment Manager will seek to construct a portfolio of investments to deliver income but which may also grow in value over time.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark
- The fund can invest across different industry sectors without limitation.
- You can buy and sell shares in the fund on each business day.
- The fund aims to distribute available income every six months.
- Derivatives (whose values are linked to the performance of other investments, e.g. company shares, currencies, etc) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may change over time. Number 1 on the scale does not mean that a fund is risk free.
- Currency risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Property fund investment risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.
- Counterparty risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Derivative risk: A derivative may not perform as expected and may create losses greater than its cost.
- Changes in interest rate risk: A rise in interest rates generally causes bond prices to fall.
- Credit risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Income risk: The amount of income is not guaranteed.
- Charges to capital risk: As charges are taken from capital, this will erode capital and may constrain capital growth.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.86%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

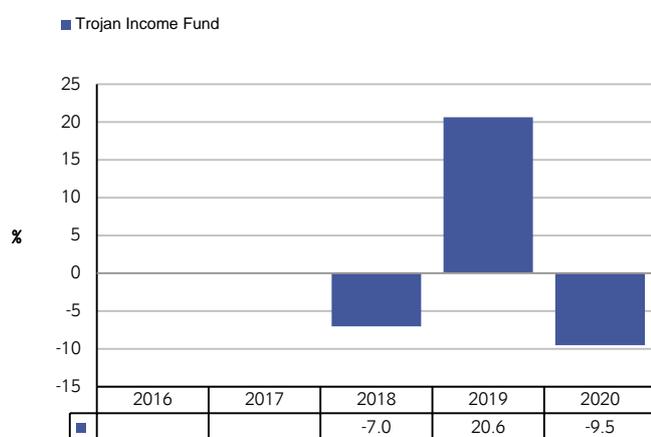

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the year ended 31 January 2021. This figure may vary from year to year. The ongoing charges are taken mainly from the capital of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment. The share class was launched in December 2017.
- The fund was launched in September 2004.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Bond Fund ("the Fund") I Income Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B57TXN82. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to provide income and grow your investment.

The Fund will invest in a broad range of bonds (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. The Fund has a highly flexible investment policy which allows it to take advantage of current market conditions and future expectations.

The bonds will be 'investment grade' and 'non-investment grade', as determined by international agencies that provide such ratings. Investment grade bonds, whilst potentially producing a lower level of income than non-investment grade bonds, are considered to be lower risk.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, these techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movements of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be paid out to you.

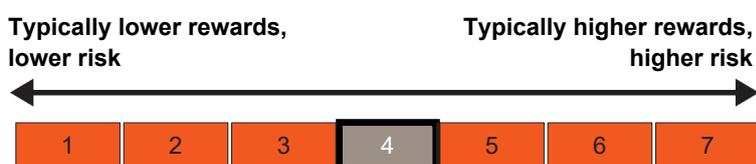

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 4-5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

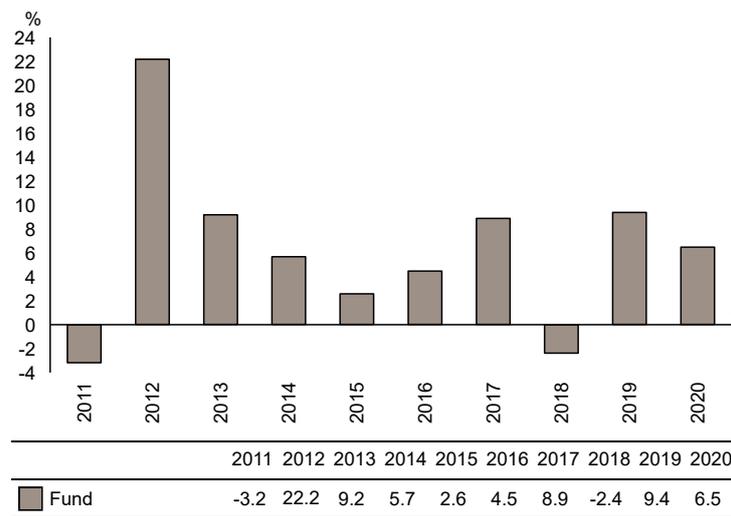

Ongoing charges	0.78%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 31 March 2021.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 26/04/2010.
- Share/unit class launch date: 26/04/2010.
- Performance is calculated in GBP.

Supplementary Information Document

What is the Supplementary Information Document?

The Supplementary Information Document (SID) contains practical and useful information about investing in funds through The Private Office (TPO).

The SID is relevant to the funds you have chosen to invest in and should be read together with the Key Investor Information Document (KIID).

For further information about the funds themselves, please refer to the KIID or prospectus which can be obtained from our website or by contacting us at the address below.

All information contained in this SID is accurate at the time of publication. However, we recommend that you visit <http://www.theprivateoffice.com/site-services/key-investor-information> for the very latest information.

What if I change my mind?

In most cases you can exercise a right to cancel by withdrawing from the contract. In general terms you will normally have a 30 day cancellation period for a life, pure protection, payment protection or pension policy and a 14 day cancellation period for all other policies.

If you choose to exercise your right to cancel an investment contract, please be aware that you might not get back the full amount invested if the value of your investment has fallen.

Please note that certain types of contract and transactions do not attract cancellation rights – you will be advised of the situation pertaining to your investments in advance of commencement of any policies.

Financial Services Compensation Scheme (FSCS)

FSCS cover depends on the nature of the claim being made. In general terms, FSCS cover is not available on claims for loss of value resulting just from the poor performance of investments. However, cover may be available for claims against authorised firms for loss arising from bad investment advice, poor investment management or misrepresentation.

Most types of investment business are covered up to a maximum limit of £85,000. This depends on the type of business and the circumstances of the claim. Long-term insurance business is covered to 100% of the claim, without any upper limit.

For further information about the compensation scheme arrangement, please see:
